Trade Advice:	
---------------	--

General Instructions:	<p>Before opening, carefully read Directions for Use, Precautionary Statements, Safety Directions and First Aid Instructions.</p> <p>APPLICATION INFORMATION This product may be used in either high or low volume sprays. Just pour into water and stir. Boom Spraying: Use 30 - 100 litres water per hectare. Aerial Spraying: Use 10 - 90 litres water per hectare.</p> <p>Note: Refer to the Department of Agriculture/Primary Industries in your state for the current restricted spraying areas.</p> <p>EQUIPMENT MAINTENANCE AND USAGE Keep the spray unit for herbicides only if possible. Otherwise wash out the unit with hot soapy water followed by several clear water rinses. DO NOT use wooden spray vats, as they cannot be cleaned. Hoses cannot be cleaned and new hoses should be fitted when the unit is to be used for any other purpose.</p>
-----------------------	---

Resistance Warning:	<p>RESISTANT WEEDS WARNING GROUP 4 HERBICIDE STRAVIA ESTER LV 680 SELECTIVE HERICIDE is a member of the Phenoxy group of herbicides. The product has the disruptors of plant cell growth mode of action. For weed resistance management STRAVIA ESTER LV 680 SELECTIVE HERICIDE is a Group 4 Herbicide. Some naturally-occurring weed biotypes resistant to STRAVIA ESTER LV 680 SELECTIVE HERICIDE and other Group 4 Herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are use repeatedly. These resistant weeds will not be controlled by STRAVIA ESTER LV 680 SELECTIVE HERICIDE or other Group 4 Herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Winfarms Pty Ltd accepts no liability for any losses that may result from the failure of STRAVIA ESTER LV 680 SELECTIVE HERICIDE to control resistant weeds.</p>
---------------------	--

Precautions:	<p>DO NOT hand harvest sugarcane for at least 1 day after application.</p> <p>Re-Entry Period If re-entering treated areas before the spray has dried, workers should wear overalls, elbow-length gloves and water-resistant footwear. Clothing must be laundered after each day's use.</p>
--------------	---

Protections:	<p>PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS DO NOT spray crops or weeds outside the stages indicated in "Critical Comments" as damage, loss of yield or inadequate weed control may result. Legume Tolerance: If clovers are present, care should be taken to ensure that they are reached the 3-4 leaf stage before spraying. Rates above 410mL of this product per hectare will destroy most clovers, whilst Lucerne and medics are susceptible at any strength. Drift Warning: DO NOT apply under meteorological conditions or from spraying equipment which could be expected to cause spray to drift onto nearby susceptible plants, adjacent crops, crop lands or pastures. In particular, avoid spray drift and vapour movement onto susceptible crops such as: cotton, tobacco, tomatoes, flowers, vegetables, vines, fruit trees, legume crops and pastures, oilseed crops or other susceptible plants and trees (eg. Kurrajongs, Eucalypts and Belahs).</p> <p>PROTECTION OF LIVESTOCK Low hazard to bees. May be applied at any times as recommended in the Directions for Use.</p> <p>PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT Very toxic to aquatic life. DO NOT contaminate wetlands or watercourses with this product or used containers.</p> <p>INTEGRATED PEST MANAGEMENT Toxic to beneficial arthropods. Not compatible with integrated pest management (IPM) programs utilising beneficial arthropods. Minimise spray drift to reduce harmful effects on beneficial arthropods in non-crop areas.</p>
--------------	--

Storage and Disposal:	<p>Store in the closed, original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. Triple-rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush, or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. DO NOT burn empty containers or product.</p> <p>Mini Bulk Returnable Container Store the original sealed drum in a cool well-ventilated area. DO NOT store for prolonged periods in direct sunlight. DO NOT tamper with the non-return valve or the security seal. DO NOT contaminate the drum with water or any foreign matter. After each use of the product, please ensure that the non-return valve, delivery system and hoses are disconnected, triple rinsed with clean water and drained accordingly. When the contents of the drum have been used, please return the empty drum to the point of purchase.</p> <p>Refillable containers Empty contents fully into application equipment. Close all valves and return to point of supply for refill or storage.</p>
-----------------------	--

Safety Directions:	<p>Harmful if swallowed. Will irritate the eyes and skin. Avoid contact with the eyes and skin.</p> <p>When opening the container and preparing spray or using undiluted concentrate, wear cotton overalls buttoned to the neck and wrist and a washable hat, elbow-length chemical resistant gloves, goggles and half face piece respirator with organic vapour/gas cartridge or canister. When using the prepared spray, wear cotton overalls buttoned to the neck and wrist and a washable hat and elbow-length chemical resistant gloves.</p> <p>If applying by hand wear half facepiece respirator with organic vapour/gas cartridge or canister. If product in eyes, wash it out immediately with water.</p> <p>After use and before eating, drinking or smoking wash hands, arms and face thoroughly with soap and water. RESTRAINTS

GENERAL RESTRAINTS

DO NOT exceed maximum application rate of 6.6 L/ha (4500 g ae/ha).

DO NOT exceed the maximum daily application rate by backpack spraying of 5.9L/day.

DO NOT apply if heavy rains or storms are forecast within 3 days.

DO NOT irrigate to the point of runoff for at least 3 days after application.

DO NOT apply if crop or weeds are stressed due to dry or excessively moist conditions. Additional USAGE restrictions apply in some crops, states and seasons. See restriction tables 1, 2, 3, 4 and 5.

SPRAY DRIFT RESTRAINTS

DO NOT apply by a vertical sprayer.

Specific definitions for terms used in this section of the label can be found at apvma.gov.au/spraydrift

DO NOT allow bystanders to come into contact with the spray cloud.

DO NOT apply in a manner that may cause an unacceptable impact to native vegetation, agricultural crops, landscaped gardens and aquaculture production, or cause contamination of plant or livestock commodities, outside the application site from spray drift. The buffer zones in the relevant buffer zone table/s below provide guidance but may not be sufficient in all situations. Wherever possible, correctly use application equipment designed to reduce spray drift and apply when the wind direction is away from these sensitive areas.

DO NOT apply unless the wind speed is between 3 and 20 kilometers per hour at the application site during the time of application.

DO NOT apply if there are hazardous surface temperature inversion conditions present at the application site during the time of application. Surface temperature inversion conditions exist most evenings one to two hours before sunset and persist until one to two hours after sunrise.

BOOM SPRAYERS

DO NOT apply by a boom sprayer unless the following requirements are met:

Spray droplets are not smaller than a VERY COARSE spray droplet size category

Minimum distances between the application site and downwind sensitive areas (see 'Mandatory buffer zones' section of the following table titled 'Buffer zones for boom sprayers') are observed.

Buffer zones for boom sprayers

DIRECTIONS FOR USE

1. FIELD CROPS

Situation And Crop	Weeds Controlled	State	Rate /ha	Critical Comments
Wheat, Barley	Refer to Weed Table	Vic only	210 - 800 mL	<p>CROP STAGES: ALL CEREALS Apply at tillered to boot stages. (WA, Vic only).</p> <p>Apply after when the first node can be felt at the base of a tiller and before swelling of the head can be felt in a tiller. (NSW, ACT only). Apply from mid-tillering (5 to 6 fully emerged main stem leaves plus one or more tillers) to before boot stage (visible swelling of the head at the top of the main stem). (Qld only). Apply from completion of tillering to early jointing stage. (SA, Tas only).</p>
		SA only	230 - 800 mL	
		QLD, NSW, ACT only	410 - 800 mL	
		TAS only	620 - 800 mL	
		WA only	800 mL	
Triticale		SA, Qld, NSW, ACT only	410 - 800 mL	
		VIC only	210 - 800 mL	
Cereal Rye		QLD, NSW, ACT only	410 - 800 mL	
		VIC only	210 - 800 mL	
Sugar Cane		QLD only	1.1 - 2.4 L	Post-emergence.
Stubble/Fallow Spray Prior to Direct Drilling or Sowing. Winter Cereals, Grain Legumes (Peanuts QLD only), Canola		ALL STATES	210 - 800 mL	<p>Observe the plant back periods given in the table in this leaflet. Must be tank mixed with a knockdown herbicide such as glyphosate, paraquat or paraquat/diquat mixtures. Select appropriate rate from the weed table.</p> <p>For Skeleton Weed, spraying should only be done 6 - 8 weeks before anticipated sowing date and subsequent cultivation limited to a minimum.</p>
Harvest Aid or Salvage Spray -	Broadleaf Weeds	ALL STATES	1.7 L	<p>Apply after dough stage of crop. Interval between application and effectiveness is 10 - 20 days. For desiccation of green matter, estimate harvest date and apply spray approximately 14 days earlier. Rain between spraying and actual harvest can negate results.</p> <p>Note: Where thistles are tall and branching above the crop, spraying can turn the branches down into the crop, presenting more stalks to cause header comb blockages. Spraying may increase seed contamination of harvest by accelerating maturity. DO NOT use with undersown legumes that have not set seed.</p>
Winter Cereals	Refer to Weed Table			
Potatoes Pre-harvest Preparation	Broadleaf Weeds such as Clover, Variegated Thistle and Cruciferous weeds	VIC, TAS only	1.1 - 2.4 L	<p>Apply approximately 4 to 5 weeks before harvest after the potato haulms have dried off. Use the highest rate where weeds are more than 30 cm in height. For boom spraying apply at least 100 litres of spray mixture per hectare. If grasses such as Rye Grass and Winter Grass are also present add</p>

UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION**

WEED TABLE

NOTE: Where weeds are to be sprayed in a CROP or PASTURE, use only the rates given for the crop in the table below. In most cases this will give control, however some hard to kill weeds may only be suppressed. E.g. *Rumex spp.* (docks) and *Polygonum spp.* (wireweed, climbing buckwheat) are killed to ground level only.
