Resistance Warning:	<p>RESISTANCE WEEDS WARNING</p> <p>GROUP I HERBICIDE</p> <p>4Farmers 2,4-D IB Ester 800 Herbicide is a member of the Phenoxy group of herbicides. 4Farmers 2,4-D IB Ester 800 Herbicide has the disruptors of plant cell growth mode of action.</p> <p>For weed resistance management, 4Farmers 2,4-D IB Ester 800 Herbicide is a Group I herbicide. Some naturally occurring weed biotypes resistant to 4Farmers 2,4-D IB Ester 800 Herbicide and other Group I herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by 4Farmers 2,4-D IB Ester 800 Herbicide or Group I herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, 4Farmers Australia Pty Ltd accepts no liability for any losses that may result from the failure of 4Farmers 2,4-D IB Ester 800 Herbicide to control resistant weeds.</p>
---------------------	--

Precautions:	<p>RE-ENTRY PERIOD</p> <p>If re-entering treated areas before the spray has dried, workers should wear overalls, elbow length gloves and water-resistant footwear. Clothing must be laundered after each day's use.</p>
--------------	---

Protections:	<p>PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS</p> <p>Direct spray contact or even slight drift may cause severe injury or destruction of any susceptible crop or other desirable plants including trees and native vegetation. DO NOT use when breeze is blowing towards nearby susceptible plants.</p> <p>This is a phenoxy herbicide that can cause severe damage to susceptible crops such as cotton, tobacco tomatoes, flowers, vegetables, vines, fruit trees, legume crops and pastures, oil seed crops or other susceptible plants and trees (eg, Kurrajongs , Belahs, Eucalypts).</p> <p>PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT</p> <p>Very toxic to aquatic life. DO NOT contaminate wetlands or watercourses with this product or used containers.</p> <p>INTEGRATED PEST MANAGEMENT</p> <p>Toxic to beneficial arthropods. Not compatible with integrated pest management (IPM) program utilizing beneficial arthropods. Minimise spray drift to reduce harmful effects on beneficial arthropods in non-crop areas.</p>
--------------	--

Storage and Disposal:	Store in the closed, original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight.
-----------------------	---

	<p>Triple-rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point.</p> <p>If not recycling, break, crush or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.</p> <p>Refillable containers Empty contents fully into application equipment. Close all valves and return to point of supply for refill or storage.</p> <p>This containers can be recycled if it is clean, dry , free of visible residues and has the drumMUSTER logo visible. Triple-rinse container for disposal. Dispose of rinsate by adding it to the spray tank. Do not dispose of the undiluted chemical on site. Wash outside of the container and the cap. Store cleaned container in a sheltered place with cap removed. It will then be acceptable for recycling at any drumMUSTER collection or similar container management program site. The cap should not be replaced, but may be taken separately.</p>

## DIRECTIONS FOR USE

### General weed control

CROP/SITUATION	WEEDS	RATE	WHP	CRITICAL COMMENTS
Fallow spray prior to Direct Drilling or Sowing Winter cereals, Grain legumes, Pastures - non-legume, Canola	Refer to weed table 1	180-700mL	7 DAYS Do NOT graze or cut for stock food	<p>DO NOT exceed 700 ml of product/ha. DO NOT apply by air or ground-based misters. Apply ONLY by ground boom-spray (or knapsack if spot spraying). To reduce spray drift, keep the ground-boom as low as practicable.</p> <p>Night Spraying - Extra care is required to ensure that inversion conditions are not present . Low level temperature inversions will generally occur most evenings and are strongest around sunrise. Use smoke generator to determine wind direction and presence of inversion conditions.</p> <p>Observe the plant back periods given in the table in this leaflet. Must be tank mixed with a knockdown herbicide such as glyphosate, paraquat/diquat. Select appropriate rate from the Weed Tale. For skeleton weed, spraying should only be done 6-8 weeks before anticipated sowing date and subsequent cultivation limited to a minimum.</p>
Wheat, Barley	Refer to Weed Table 2	700mL		Apply from first node stag (Z31) until the start of booting ( when the head can be felt at the base of the stem)

**NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS  
AUTHORISED UNDER APPROPRIATE LEGISLATION**

### IMPORTANT:

**WHEN APPLIEED TO DRY SOILS AT LEAST 15MM OF RAIN MUST FALL PRIOR TO THE COMMENCEMENT OF THE PLANT BACK PERIOD.**

## **RESTRAINTS:**

### **GENERAL RESTRAINTS**

DO NOT USE in any state or territory except WA.

Product MUST BE USED in accordance with relevant WA legislation and regulations.

NOTE: Refer to Department of Agriculture and Food for state restricted spray areas  
[agric.wa.gov.au](http://agric.wa.gov.au).

DO NOT apply this product by aircraft or ground based misters.

DO NOT apply this product:

- in aquatic situations
- to rights of way
- as a harvest aid/salvage spray

DO NOT apply more than 560g ae/ha (700mL of this product per ha) (ae=acid equivalent)

DO NOT apply if heavy rains or storms are forecast within 3 days.

DO NOT irrigate to the point of runoff for at least 3 days after application.

DO NOT apply if crop or weeds are stressed due to dry or excessively moist conditions.

### **SPRAY DRIFT RESTRAINTS**

DO NOT apply by a vertical sprayer

Specific definitions for terms used in this section of the label can be found at  
[www.apvma.gov.au/spraydrift](http://www.apvma.gov.au/spraydrift)

DO NOT allow bystanders to come into contact with the spray cloud.

DO NOT apply in a manner that may cause an unacceptable impact to native vegetation, agricultural crops, landscaped gardens and aquaculture production, or cause contamination of plant or livestock commodities, outside the application site from spray drift. The buffer zones in the relevant buffer zone table/s below provide guidance but may not be sufficient in all situations. Wherever possible, correctly use application equipment designed to reduce spray drift and apply when the wind direction is away from these sensitive areas.

DO NOT apply unless the wind speed is between 3 and 20 kilometers per hour at the application site during the time of application.

DO NOT apply if there are hazardous surface temperature inversion conditions present at the application site during the time of application. Surface temperature inversion conditions exist most evenings one to two hours before sunset and persist until one or two hours after sunrise.

DO NOT apply within 2km of potentially sensitive or susceptible aquatic areas, town sites or non-target vegetation. The latter includes commercial seedling and plant nurseries, horticultural crops, grapevines, tomato crops, intensive agricultural operations and wildflower processing crops, national parks, nature reserves, areas and aquaculture operations.

## **GENERAL INSTRUCTIONS:**

Before opening, carefully read Directions for Use, Precautionary Statements, Safety Directions and First Aid Instructions. DO NOT apply by air. DO NOT spray in high winds. DO NOT spray crops or weeds outside the stages indicated in the Critical Comments as damage, loss of yield or inadequate weed control may result.

## **APPLICATION INFORMATION**

This product may be used in either high or low volume sprays. Just pour into water and agitate.

Boom Spraying - Use 50-120L water/ha.

## **EQUIPMENT MAINTENANCE AND USAGE**

Keep the spray unit for herbicides only if possible. Otherwise wash out the unit with a suitable tank cleaner or hot soapy water followed by several clear water rinses. Hoses cannot be cleaned and new hoses should be fitted when the unit is to be used for any other purpose.
