

Product Name: CropSure Jagged Selective Herbicide  
APVMA Approval No: 93616/RV2024

<b>Label Name</b>	CropSure Jagged Selective Herbicide
<b>Signal Headings</b>	DANGEROUS POISON KEEP OUT OF REACH OF CHILDREN READ SAFETY DIRECTIONS BEFORE OPENING OR USING
<b>Constituent Statement:</b>	Active Constituents: 250g/L BROMOXYNIL present as the octanoate ester 25g/L DIFLUFENICAN  Solvents: 416g/L LIQUID HYDROCARBONS 150g/L N-METHYL-2-PYRROLIDONE
<b>Mode of Action:</b>	GROUP 6 12 HERBICIDE
<b>Statement of Claims:</b>	For the control of certain broadleaf weeds in winter cereals and pasture as specified in the Directions for Use
<b>Net Contents:</b>	5L - 1000L
<b>Restraints:</b>	<p>DO NOT apply if crop or weeds are stressed due to dry or excessively moist conditions. DO NOT apply to crops under stress due to disease or insect damage. DO NOT apply to frost-affected crops or if frosts are imminent. DO NOT apply if heavy rain is expected within 4 hours. DO NOT apply with crop oils (cereals only).</p> <p>SPRAY DRIFT RESTRAINTS Specific definitions for terms used in this section of the label can be found at <a href="http://apvma.gov.au/spraydrift">apvma.gov.au/spraydrift</a> DO NOT allow bystanders to come into contact with the spray cloud. DO NOT apply in a manner that may cause an unacceptable impact to native vegetation, agricultural crops, landscaped gardens and aquaculture production, or cause contamination of plant or livestock commodities, outside the application site from spray drift. Wherever possible, correctly use application equipment designed to reduce spray drift and apply when the wind direction is away from these sensitive areas. DO NOT apply unless the wind speed is between 3 and 20 kilometres per hour at the application site during the time of application. DO NOT apply if there are hazardous surface temperature inversion conditions present at the application site during the time of application. Surface temperature inversion conditions exist most evenings 1 to 2 hours before sunset and persist until 1 to 2 hours after sunrise.</p>
<b>Directions For Use:</b>	This section contains file attachment.
<b>Other Limitations:</b>	

<b>Withholding Period:</b>	Harvest: Cereals, Grapes – NOT REQUIRED WHEN USED AS DIRECTED Grazing: Pasture, Cereals – DO NOT GRAZE OR CUT FOR STOCK FOOD WITHIN 8 WEEKS AFTER APPLICATION.
----------------------------	---

<b>Trade Advice:</b>	
----------------------	--

<b>General Instructions:</b>	This section contains file attachment.
------------------------------	--

<b>Resistance Warning:</b>	<p>Resistant Weeds Warning GROUP 6 12 HERBICIDE</p> <p>CropSure Jagged Selective Herbicide is a member of the nitrile and nicotinilide groups of herbicides. CropSure Jagged Selective Herbicide is an inhibitor of photo synthesis at photo system II and carotenoid biosynthesis. For weed resistance management, CropSure Jagged Selective Herbicide is a Group 6, 12 herbicide. Some naturally occurring weed biotypes resistant to CropSure Jagged Selective Herbicide and other Group 6, 12 herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by CropSure Jagged Selective Herbicide or other Group 6, 12 herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, CropSure Pty Ltd accepts no liability for any losses that may result from the failure of CropSure Jagged Selective Herbicide to control resistant weeds.</p>
----------------------------	---

<b>Precautions:</b>	
---------------------	--

<b>Protection Statements:</b>	<p>PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS DO NOT apply under weather conditions, or from spraying equipment, that may causes spray to drift onto nearby susceptible plants/crops, cropping lands or pastures. Wash sprayer thoroughly after use.</p> <p>PROTECTION OF WILD LIFE, FISH, CRUSTACEANS AND ENVIRONMENT Dangerous to fish. DO NOT contaminate streams, rivers or watercourses with the chemical or used containers.</p>
-------------------------------	---

<b>Storage and Disposal:</b>	<p>This product must be stored in a locked room or place away from children, animals, food, feedstuffs, seed and fertilisers. Store in the closed, original container in a cool, well-ventilated area. Do not store for prolonged periods in direct sunlight.</p> <p>This container can be recycled if it is clean, dry, free of visible residues and has the drumMUSTER logo visible. Triple-rinse container for disposal. Dispose of rinsate by adding it to the spray tank. Do not dispose of undiluted chemical on site. Wash outside of the container and the cap. Store cleaned container in a sheltered place with cap removed. It will then be acceptable for recycling at any drumMUSTER collection or similar container management program site. The cap should not be replaced, but may be taken separately.</p> <p>If not recycling, break, crush, or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.</p> <p>Refillable Containers: Empty contents fully into application equipment. Close all valves and return to point of supply for refill or storage.</p>
------------------------------	---

<b>Safety Directions:</b>	Product is harmful if inhaled or swallowed. Will irritate eyes, nose, throat and skin. Avoid inhaling spray mist. When preparing spray wear elbow length PVC gloves and face-shield. If product in eyes, wash it out immediately with water. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each day's use wash gloves, face shield and contaminated clothing.
---------------------------	---

<b>First Aid Instructions:</b>	If poisoning occurs, contact a doctor or Poisons Information Centre. (Phone Australia 13 11 26, New Zealand 0800 764 766). If swallowed, do not induce vomiting.
--------------------------------	--

<b>First Aid Warnings:</b>

# DIRECTIONS FOR USE

For scientific names see Weeds List

CROP	WEEDS CONTROLLED	WEED STAGE	RATE/ HA	STATE	CRITICAL COMMENTS
<b>Wheat, barley, triticale, cereal rye</b> (including cereals undersown with clover and/or lucerne), and these <b>cover crops in vineyards</b>  <b>Pasture</b> Clover and/or lucerne-based pasture (newly sown or established) including <b>cover crops in vineyards</b>	Wild radish	Up to 2 leaf stage and not more than 60 mm in diameter and where weed density is less than 50 plants/m <sup>2</sup>	350 mL	WA only	<b>CROP STAGE:</b> <b>Cereals</b> 2 leaf to fully tillered (Zadok's Z12-29) Optimum results are achieved when sprayed at 4-8 weeks post-sowing. <b>Warning:</b> CropSure Jagged Selective Herbicide may cause transient crop yellowing of cereals. (Refer to " <b>Crop Tolerance</b> " section of <b>General Instructions</b> ).  <b>Clover and lucerne</b> Application is recommended prior to the 8 <sup>th</sup> trifoliate leaf stage. Application can be made from the 1 <sup>st</sup> trifoliate leaf stage in Qld, NSW, ACT and Vic only. In other States applications prior to the 3 leaf stage may result in crop damage if seedlings are under stress and in sandy soils. DO NOT apply to annual medics. <b>Warning:</b> CropSure Jagged Selective Herbicide may affect growth and seed set of some varieties of clover and Lucerne (Refer to " <b>Crop Tolerance</b> " section of <b>General Instructions</b> ).  COVER CROPS IN VINEYARDS: When using in vineyard situations, apply during vine dormancy only. Contact with vines must be avoided. Particular care should be taken if applied in late autumn or early spring, when vines may not be fully dormant.  <b>WEED STAGE:</b> Apply from early post-emergence.  <b>APPLICATION:</b> Apply when weeds are actively growing. Ensure thorough coverage of weeds. Where crop or weed density is high, increase water volume.  <b>CRITICAL COMMENTS</b> <b>CONTINUED ON NEXT PAGE</b>
	Wild mustard, Wild radish	Up to 4 leaf stage and not more than 120 mm in diameter	500 mL	All States	
		Up to 6 leaf stage and not more than 150 mm in diameter	750 mL		
		Up to 8 leaf stage and not more than 180 mm in diameter	1.0 L		
	Canola (rapeseed), charlock, turnip weed, wild turnip	Up to 2 leaf stage and not more than 60 mm in diameter	500 mL		
		Up to 4 leaf stage and not more than 120 mm in diameter	750 mL		
	Shepherd's purse		1.0 L		
	Capeweed	Up to 4 leaf stage and not more than 120 mm in diameter	500 mL		
		Up to 6 leaf stage and not more than 150 mm in diameter	750 mL		
		Up to 8 leaf stage and not more than 180 mm in diameter	1.0 L		
	Corn gromwell	Up to 4 leaf stage	500 mL		
		Up to 6 leaf stage	750 mL		
	Climbing buckwheat	Up to 2 leaf stage	500 mL		
		Up to 4 leaf stage	750 mL		
		Up to 6 leaf stage	1.0 L		
	Deadnettle, Paterson's curse, (Salvation Jane), rough poppy	Up to 2 leaf stage	500 mL		
		Up to 4 leaf stage	750 mL		
	Amsinckia				
	Doublegee (spiny emex)	Up to 2 leaf stage	500mL	Qld, NSW, ACT, Vic, Tas, WA only	
		Up to 4 leaf stage	750mL	All States	

CROP	WEEDS CONTROLLED	WEED STAGE	RATE/HA	STATE	CRITICAL COMMENTS
<b>Wheat, barley, triticale, cereal rye</b> (including cereals undersown with clover and/or lucerne), and these <b>cover crops in vineyards</b>  <b>Pasture</b> Clover and/or lucerne-based pasture (newly sown or established) including <b>cover crops in vineyards</b>	Chamomile, common peppercress, lesser swinecress, purple calandrinia, (mountain sorrel), tree hogweed	Up to 4 leaf stage.	1.1 L	All States	<b>CONTINUED FROM PREVIOUS PAGE</b> In most situations the rate specified for each weed size will give satisfactory control. However, under certain conditions such as: * high crop and weed density, * late season germinations, * Abnormal weed growth (including early flowering); Higher rates of product (up to the maximum rate of application specified for that weed) may be required.  CropSure Jagged Selective Herbicide will not effectively control: * regrowth of suppressed weeds, * transplanted weeds, * regrowth from rhizomes or roots, * weeds growing under stress from previous herbicide applications. * Radish plants beyond rosette stage  <b>WILD RADISH:</b> Effective residual activity of this product may be reduced where: * rates lower than 1.0L/ha are used; * dry conditions prevail; * poor coverage of the soil surface is achieved; * crop is grown in non-wetting sand; * soils have a high content of clay or organic matter.  <b>VOLUNTEER LUPINS:</b> In some situations, the higher rate of 1.0L/ha may be required to effectively suppress volunteer lupins at the 4 leaf stage.  # CropSure Jagged Selective Herbicide will suppress seedling dock but will not suppress regrowth from transplanted roots.
	Fat hen, field madder, saffron thistle, Variegated thistle		1.0 L		
	Ox-tongue, wireweed	Up to 2 leaf stage			
	Fireweed	Up to 4 leaf stage	500 mL	Qld, NSW, ACT, Vic, SA, WA, NT only	
	Common cotula (bird's eye), Pheasants eye (adonis)	Up to 4 leaf stage	560 mL	SA only	
		Greater than 4 leaf stage	1.1 L		
<b>Wheat, barley, triticale, cereal Rye</b>	Fumitory	2-6 leaf stage	350 + 200 mL/ha terbutryn (500g/L)	WA only	
<b>Wheat, barley, triticale, cereal rye</b> (including cereals undersown with clover and/or lucerne), and these <b>cover crops in vineyards</b>  <b>Pasture</b> Clover and/or lucerne-based pasture (newly sown or established) Including <b>cover crops in vineyards</b>	<b>Suppression of the Following Weeds</b>				
	Dense-flower	Up to 2 leaf stage	750 mL	All States	
	Chickweed, Common sowthistle, (milkthistle), dock, hexham scent, (King Island melilot), prickly lettuce, scarlet pimpernel, skeleton weed, sorrel, speedwell, three-horned bedstraw, toad rush	Up to 4 leaf stage	1.0 L		
		Volunteer lupins	500mL-1.0L		
	Crassula (stonecrop)	Up to 5 leaf stage	500 mL		
	Long storksbill	Up to 4 leaf stage			
	Volunteer field peas	Up to 5 node stage	750 mL		
	Ward's weed	Up to 5 leaf stage	1.0 L		
	Vetch	Up to 2 leaf stage			
	Mouse-eared chickweed				
	Mexican poppy				
	Mintweed, spoon cudweed	Up to 4 leaf stage		NSW & ACT only	
	New Zealand	Up to 2 leaf stage	750 mL	Qld only	
	Cleavers	Up to 1 whorl stage	1.0 L	SA only	
	Ball mustard	Up to 4 leaf stage			
	Horehound	Pre-emergence			
	Marshmallow	Up to 2 leaf stage			

CROP	WEEDS CONTROLLED	WEED STAGE	RATE/HA	STATE	CRITICAL COMMENTS
Wheat, barley, triticale, cereal rye	Wild radish	Up to the 4 leaf stage and not more than 120 mm in diameter	350 mL plus 200 mL MCPA LVE (500 g/L)	WA only	<p><b>Refer also to all Critical Comments for cereals above.</b></p> <p><b>DO NOT</b> use this tank-mix if cereals are under sown with Lucerne or annual medics. <b>DO NOT</b> use this tank-mix in vineyards.</p> <p><u>Crop Stage</u> CropSure Jagged Selective Herbicide 350mL + MCPA LVE 200 mL: Apply from 3 leaf to fully tillered (Zadok's Z13 to Z30). CropSure Jagged Selective Herbicide 500mL + MCPA LVE 200 mL: Apply from 3 leaf to fully tillered (Zadok's Z13 to Z30). CropSure Jagged Selective Herbicide 500 mL + MCPA LVE 400 mL: Apply from 5 leaf stage to fully tillered (Zadok's Z15 to Z30).</p> <p>Optimum results are achieved when sprayed at 4-8 weeks post sowing. <b>Warning:</b> CropSure Jagged Selective Herbicide may cause transient crop yellowing of cereals. (Refer to "<b>Crop Tolerance</b>" section of <b>General Instructions</b>)</p> <p>Observe instructions also on MCPA LVE product label.</p>
		Up to the 6 leaf stage and not more than 150 mm in diameter	500 mL plus 200 mL MCPA LVE (500 g/L)	All States	
		Up to the 8 leaf stage and not more than 180 mm in diameter.	500 mL plus 400 mL MCPA LVE (500 g/L)		

**NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORIZED UNDER APPROPRIATE LEGISLATION.**

## **WEEDS LIST**

<b>WEED (Common name)</b>	<b>(Scientific name)</b>
Amsinckia	<i>Amsinckia</i> spp.
Ball mustard	<i>Neslia paniculata</i>
Canola (rapeseed)	<i>Brassica napus</i>
Capeweed	<i>Arctotheca calendula</i>
Chamomile	<i>Matricaria matricarioides</i>
Charlock	<i>Sinapis arvensis</i>
Chickweed	<i>Stellaria media</i>
Cleavers	<i>Galium aparine</i>
Climbing buckwheat	<i>Fallopia convolvulus</i>
Common cotula (bird's eye)	<i>Cotula australis</i>
Common peppergrass	<i>Lepidium africanum</i>
Common sowthistle (milk thistle)	<i>Sonchus oleraceus</i>
Corn gromwell	<i>Buglossoides arvensis</i>
Crassula (stonecrop)	<i>Crassula</i> spp.
Deadnettle	<i>Lamium amplexicaule</i>
Dense-flower fumitory	<i>Fumariadensisiflora</i>
Dock	<i>Rumex</i> spp.
Doublegee (spiny emex)	<i>Emex australis</i>
Fat hen	<i>Chenopodium album</i>
Field madder	<i>Sherardia arvensis</i>
Fireweed	<i>Senecio</i> spp.
Fumitory	<i>Fumaria</i> spp.
Hexham scent (King Island melilot)	<i>Melilotus indicus</i>
Horehound	<i>Marubium vulgare</i>
Lesser swinecress	<i>Coronopus didymus</i>
Long storksbill	<i>Erodium botrys</i>
Marshmallow	<i>Malva parviflora</i>
Mexican poppy	<i>Argemone ochroleuca</i>
Mintweed	<i>Salvia reflexa</i>

<b>WEED (Common name)</b>	<b>(Scientific name)</b>
Mouse-eared chickweed	<i>Cerastium glomeratum</i>
New Zealand spinach	<i>Tetragonia tetragonoides</i>
Ox-tongue	<i>Picris echioides</i>
Paterson's curse (Salvation Jane)	<i>Echium plantagineum</i>
Pheasant's eye (adonis)	<i>Adonis dentatus</i>
Prickly lettuce	<i>Lactuca serriola</i>
Purple calandrinia (mountain sorrel)	<i>Calandrinia menziesii</i>
Rough poppy	<i>Papaver hybridum</i>
Saffron thistle	<i>Carthamus lanatus</i>
Scarlet pimpernel	<i>Anagallis arvensis</i>
Shepherd's purse	<i>Capsella bursa- pastoris</i>
Skeleton weed	<i>Chondrilla juncea</i>
Sorrel	<i>Rumex acetosella</i>
Speedwell	<i>Veronica</i> spp.
Spoon cudweed	<i>Stuartina muelleri</i>
Three-horned bedstraw	<i>Galium tricornutum</i>
Toad rush	<i>Juncus bufonius</i>
Tree hogweed	<i>Polygonum patulum</i>
Turnip weed	<i>Rapistrum rugosum</i>
Variegated thistle	<i>Silybum marianum</i>
Vetch	<i>Vicia sativa</i>
Volunteer field peas	<i>Pisum sativum</i>
Volunteer lupins	<i>Lupinus angustifolius</i>
Ward's weed	<i>Carrichtera annua</i>
Wild mustard	<i>Sisymbrium</i> spp.
Wild radish	<i>Raphanusra phanistrum</i>
Wild turnip	<i>Brassica tournefortii</i>
Wireweed	<i>Polygonum aviculare</i>

### **GENERAL INSTRUCTIONS:**

- This product is a post-emergence contact herbicide, which may provide residual control of wild radish up to 4 weeks after application.
- Apply CropSure Jagged Selective Herbicide immediately after mixing. Do not allow to stand in the spray tank overnight.
- Optimum results will be obtained if good soil moisture exists at and after application and weeds are not stressed.
- Some pre-emergence herbicides, such as atrazine can cause stress to certain crops resulting in an increase in crop damage when using this product. Crops which are particularly sensitive are Lucerne and subterranean clover.

### **Temperature warning**

Do not apply CropSure Jagged Selective Herbicide if frosts are imminent. Frost causes stress on crops and weeds and could result in increased crop effects and/or decreased weed control. To ensure good results CropSure Jagged Selective Herbicide should only be applied once the weeds and crop are no longer under stress from the frost conditions.

Avoid application when maximum daily temperatures above 20°C occur, or are likely to occur for a few days after application, as increased crop damage may result.

### **CROP TOLERANCE**

#### **Cereals**

After application some transient crop yellowing may occur. This usually appears as yellow or white banding on leaves. Provided the crop is not under stress from pre-emergent herbicide, root disease, insect damage, frost, dry or excessively moist conditions, the development of the crop and subsequent growth will be unaffected.

#### **Lucerne**

##### **Warning**

The tolerance of Lucerne varieties to CropSure Jagged Selective Herbicide can vary with rate of application, soil type, crop health, stage of growth and degree of moisture and temperature stress. CropSure Jagged Selective Herbicide may result in transient crop yellowing and suppression of growth with a resultant initial reduction in dry matter. For this reason we recommend application prior to the 8 trifoliate leaf stage. However, under normal growing conditions subsequent growth and seed yield should not be affected. Crop damage may be increased if rates higher than 500mL/ha are used and in areas where spray over lapping has occurred. Under normal growing conditions, the following Lucerne varieties have shown acceptable levels of foliage tolerance to CropSure Jagged Selective Herbicide applied at 500mL/ha: Hunter River, Nova and Dekalb 185. Varieties not listed should be tested before using CropSure Jagged Selective Herbicide over large areas.

Consult your local CropSure Pty Ltd representative for advice on specific varieties.

#### **Subterranean clover**

##### **Warning**

The tolerance of subterranean clover varieties to CropSure Jagged Selective Herbicide can vary with rate of application, soil type, crop health, stage of growth and degree of moisture and temperature stress. CropSure Jagged Selective Herbicide may result in transient crop yellowing and suppression of growth with an initial reduction in dry matter. For this reason we recommend application prior to the 8 trifoliate leaf stage. However, under normal growing conditions subsequent growth and seed yield should not be affected. Crop damage may be increased if rates higher than 500mL/ha are used and in areas where spray overlapping has occurred.

Under normal growing conditions, the following varieties have shown acceptable levels of foliage tolerance to CropSure Jagged Selective Herbicide applied at 500mL/ha: Daliak, Dalkeith, Denmark, Goulburn, Karridale, Leura, Mt. Barker, Nungarin, Rosedale, Seaton Park, Trikkala and Woogenellup.

The variety Junee has shown increased sensitivity to CropSure Jagged Selective Herbicide so care should be taken if this variety is part of the pasture sward.

The effects of CropSure Jagged Selective Herbicide on subterranean clover seed yield have been tested on the following varieties. Under normal growing conditions they show acceptable levels of tolerance to

CropSure Jagged Selective Herbicide applied at 500mL/ha. However, higher rates may reduce seed yield under conditions of low weed pressure:

Denmark, Goulburn, Larissa, Nungarin, Seaton Park, Trikkala and Woogenellup.

Varieties not listed should be tested before using CropSure Jagged Selective Herbicide over large areas. Consult your local CropSure Pty Ltd representative for advice on specific varieties.

### **Other Clovers**

#### **Warning**

The tolerance of clover varieties to CropSure Jagged Selective Herbicide can vary with rate of application, soil type, crop health, stage of growth and degree of moisture and temperature stress. CropSure Jagged Selective Herbicide may result in transient crop yellowing and suppression of growth with a resultant initial reduction in dry matter. For this reason we recommend application prior to the 8 trifoliate leaf stage. However, under normal growing conditions subsequent growth and seed yield should not be affected. Crop damage may be increased if rates higher than 500mL/ha are used and in areas where spray overlapping has occurred. The effect on seed yield of other clovers has not been determined.

The following varieties of clover have shown increased sensitivity to CropSure Jagged Selective Herbicide: Big Bee, Sacromonte (Berseem), Haifa (White), Zulu (Arrowleaf), Kyambro, Lupers and Maral (Persian).

Care should be exercised if these clovers are part of the pasture sward.

Varieties not listed should be tested before using CropSure Jagged Selective Herbicide over large areas. Consult your local CropSure Pty Ltd representative for advice on specific varieties.

### **Subsequent Crops**

To reduce effect on subsequent susceptible crops (e.g. canola), ensure thorough cultivation of soil prior to the sowing of these crops.

### **MIXING**

To ensure even mixing, half fill the spray tank with clean water and add the required amount of product. Agitate thoroughly then add the remainder of the water. Agitate thoroughly while carrying out spray operations. Reseal part-used container immediately after use.

### **APPLICATION**

#### **Boom Sprayer**

A minimum of 50 L water/ha should be used, however, for optimum results water rates of 70-100 L/ha are recommended. Increase the water volume where weed infestation is heavy or the crop cover is dense. Complete coverage of weeds is essential. Higher water volumes (up to 100 L/ha) will ensure faster activity of the product on the weeds but may increase the symptoms of crop damage.

The following settings are examples which will ensure excellent coverage of exposed weeds:

<b>Water Rate</b>	50 L/ha	75 L/ha	75 L/ha
<b>Nozzle</b>	Hardi No. 10 or equivalent	Hardi No.12 or equivalent	Hardi No.14 or equivalent
<b>Speed</b>	10 km/h	10 km/h	12 km/h
<b>Pressure</b>	240 kPa(2.4 bar)	220 kPa(2.2 bar)	210 kPa(2.1 bar)

### **Controlled Droplet Application (CDA)**

Insufficient information is available to recommend the application of this product by CDA.

### **Warning**

The rubber components present in some spraying units may be affected by exposure to the solvents in CropSure Jagged Selective Herbicide. To reduce this risk it is recommended that the spray unit be thoroughly washed with a boom cleaner and fresh water after use.

### **Aircraft**

Insufficient information is available to recommend the application of this product by air.

## COMPATIBILITY

The following herbicide products are physically compatible with CropSure Jagged Selective Herbicide as two-way mixtures in the spray tank, but should only be used for the crops specified, and only when the crop is also specified on the label of the compatible product: (See below for list of compatible insecticides.)

Crop	CropSure Jagged	Compatible Product
Wheat, triticale, cereal rye (including undersown)	Up to 750 mL/ha	Hoegrass® (barley also), Tristar® Advance (barley also), Wildcat® 110EC (wild oats only, high rate)
Wheat, barley, triticale, cereal rye (including undersown)	All rates	Broadstrike®
Wheat, barley, triticale, cereal rye (not undersown)	Up to 500 mL/ha	Ally®, Glean®, MCPA LVE (500 g/L product) (up to 500 mL/ha only)
	All rates	2,4-D amine 500, Eclipse®, Cadence® (up to 115 g only), Lontrel®
		Topik®
Wheat only (not undersown)		
Established Lucerne only	Up to 750 mL/ha	Simazine (500 g/L product) (up to 1.25 L/ha only) and simazine (500 g/L) / paraquat (200 g/L) mixture
Newly sown and established Lucerne and clover only	Up to 750 mL/ha	Targa®, Fusilade®, 2,4-DB amine (500 g/L)
	Up to 1.0 L/ha	Broadstrike®

When mixing CropSure Jagged Selective Herbicide with other herbicides, crop yellowing may be enhanced.

When mixing with Hoegrass®, Wildcat® 110 EC or Tristar® Advance some reduction in the efficacy and speed of action of these products may occur.

When mixing with Targa® or Fusilade® some reduction in the efficacy and speed of action of these products and CropSure Jagged Selective Herbicide may occur.

In tank-mixtures with Ally® and Glean®, rates of CropSure Jagged Selective Herbicide higher than 500 mL/ha may cause significant crop damage. If the crop is stressed, the application of the herbicide tank-mixtures may cause yield reduction. When mixing with Cadence® a temporary wilting may be evident in some crops after application.

The mixture of CropSure Jagged Selective Herbicide and simazine should be applied during winter to Lucerne which is not actively growing. This mixture may result in an increased crop effect but this can be reduced if the lucerne is grazed or cut before spraying. DO NOT mix CropSure Jagged Selective Herbicide with Verdict®.

Growers should seek advice before spraying recently released cereal varieties.

This product may be mixed in the spray tank with one of the following insecticides according to the directions for the insecticide product: Chlorpyrifos (500 g/L product), Decis Options®, dimethoate, Dominex®100EC, Fastac® Duo, Le-mat® 290 SL, Talstar® and Thiodan®.

Use the recommended rates for CropSure Jagged Selective Herbicide and its tank-mix partner as well as the surfactant recommendation of the tank-mix partner. Read the label of the tank-mix partner before mixing and using the tank mixture. If another herbicide is applied as a tank mix, observe the plantback restrictions on that label.

### **Warning**

DO NOT use crop oils with CropSure Jagged Selective Herbicide or CropSure Jagged Selective Herbicide tank mixtures in cereals.

As formulations of other manufacturers' products are beyond the control of CropSure Pty Ltd, all mixtures should be tested prior to mixing commercial quantities.
