

Product Name: Macspray Picloram Herbicide
APVMA Approval No: 89511/125108

Label Name:	Macspray Picloram Herbicide
-------------	-----------------------------

Signal Headings:	READ SAFETY DIRECTIONS BEFORE OPENING OR USING
------------------	--

Constituent Statements:	240 g/L PICLORAM present as the POTASSIUM SALT
-------------------------	--

Mode of Action:	GROUP I HERBICIDE
-----------------	-------------------

Statement of Claims:	SITUATION: Agricultural Non-Crop Areas, Commercial and Industrial Areas, Pasture and Rights of Way CONTROLS: A wide range of annual, perennial, noxious and woody weeds as per the Directions for Use
----------------------	--

Net Contents:	1L to 1000L
---------------	-------------

Restraints:	<p>RESTRAINTS ALL SITUATIONS</p> <p>DO NOT apply to weeds which are not actively growing or to plants which may be stressed (not actively growing) due to prolonged periods of extreme cold, moisture stress (waterlogged or drought affected) or previous herbicide treatment, as reduced levels of control may result.</p> <p>DO NOT use in high winds.</p> <p>DO NOT spray if rain is likely to occur within four hours when applying in tank mixtures with 2,4-D amine. Refer to guidelines below for rainfall interval when tank mixing with triclopyr.</p> <p>DO NOT apply close to, or on areas, containing roots of desirable vegetation, where treated soil may be washed into areas growing, or to be planted to, desirable plants, or on sites where surface water from heavy rain can be expected to run off to areas containing, or to be planted to, susceptible crops or plants.</p> <p>DO NOT move soil which may have been sprayed to areas where desirable plants are to be grown.</p> <p>Picloram remains active in the soil for extended periods depending on the rate of application, soil type, rainfall, temperature, humidity, soil moisture and soil organic matter. In some states some uses of this product are controlled by legislation. Check with your local Department of Agriculture or Primary Industry for further details.</p>
-------------	--

TANK MIXTURES WITH Triclopyr 600 EC
DO NOT burn off, cut or clear blackberry or other woody weeds for at least 6 months after spraying.
DO NOT apply if rain is likely within one hour or if foliage is wet from rain or dew.
DO NOT apply by aerial application in wind in excess of 15 km/hr and air temperatures above 35°C.
In areas prone to flooding, treatment should commence after any annual flooding as such areas flooded within 9 months following application may have reduced results.

Directions for Use:	This section contains file attachment.
---------------------	--

Other Limitations:	IN TASMANIA FOR BLACKBERRY: DO NOT TREAT BUSHES CARRYING MATURE OR NEAR MATURE FRUIT. FOR NATIVE VEGETATION: The use of MACSPRED PICLORAM plus Triclopyr 600 EC on native vegetation must be done in accordance with STATE and/or LOCAL legislation.
--------------------	---

Withholding Periods:	TANKMIX WITH 2,4-D: HARVEST: NOT REQUIRED WHEN USED AS DIRECTED. DO NOT GRAZE OR CUT PASTURES FOR STOCK FOOD FOR 7 DAYS AFTER APPLICATION. TANKMIX WITH TRICLOPYR 600 EC: NOT REQUIRED WHEN USED AS DIRECTED.
----------------------	---

Trade Advice:	
---------------	--

General Instructions:	GENERAL INSTRUCTIONS MIXING MACSPRED PICLORAM Herbicide should be mixed in water only. Mix only sufficient chemical for each days use and avoid storing mix. Half fill the spray tank with water and add the required quantity of MACSPRED PICLORAM Herbicide and complete filling. Agitate continuously to ensure thorough mixing before and during application. Tank mixtures: Wettable powder or dry flowable formulations (e.g. water dispersible granules) should be added to the spray tank first, followed by suspension concentrates (flowables), water soluble salts (e.g. MACSPRED PICLORAM, MCPA 750, 2,4-D Amine 625) and then emulsifiable concentrate formulations (e.g. Flagship). Add spraying oils and surfactants (wetters) last, if required. APPLICATION MACSPRED PICLORAM may be applied by: 1. Ground Boom: DO NOT apply with smaller than COARSE to VERY COARSE spray droplets according to the ASABE S572 definition for standard nozzles. Spray using accurately calibrated equipment delivering 50-100 L water/ha. DO NOT use less than 200 L/ha in sugarcane. When treating maize and sorghum, the risk of crop injury will be reduced if dropper nozzles are used to avoid spraying the growing point of the crop. Set the boom at a height to ensure a double overlap of the nozzle pattern. Misting machines and boomjet sprayers should not be used for treating crops. For use with Triclopyr 600 EC (Table 2): Application in a minimum spray volume of 200 L/ha for Galenia and St John's Wort and 600 L of water/ha for Sicklepod. For use in fallow a minimum spray volume of 50 L/ha is recommended. Boom height must be set to ensure double overlap of nozzle patterns.
-----------------------	--

2. Aerial Application: DO NOT apply MACSPRED PICLORAM by aircraft when wind speed is less than 3 kilometres per hour or greater than 15 km/hr as measured at the application site and/or the air temperature is above 30°C, or when the wind is blowing towards susceptible crops, or when there is no wind. Use accurately calibrated equipment to deliver not less than 20 L water/ha

For use with Triclopyr 600 EC (Table 3): Apply in 200 L water/ha using an aircraft to apply 100 L per pass on a double overlap pattern.

3. High Volume Application: Apply using a calibrated handgun with D5 or D6 (2-3 mm) nozzle plate and operated at 400-500 kPa. Spray to thoroughly wet the weed, usually 2,500-3,500 L water/infested ha is required.

For use with Triclopyr 600 EC – Woody Weeds Situations (Table 1): Weeds need to be actively growing for herbicides to have an optimal effect. Delay treatment until regrowth has had time to grow to approximately 1 metre in situations which have been bulldozed, slashed, burnt, ploughed or areas having previous chemical treatment.

High volume spraying: Thorough coverage of foliage to the point of runoff is essential, however, avoid excess spraying which is wasteful of chemical.

Hand Gun: Apply the recommended mix to give full coverage of leaves and stems through a No. 6 to 8 tip at 700 to 1500 kPa (400 to 500 kPa for St John's Wort).

A spray volume of 3000 to 4000 L per infested hectare of 1 to 2 metre high blackberry (30 to 40 L/100 m²) should be used. Use 2000 L of spray mixture/ha of Galenia infestation (i.e. 20 L/100 m² infested area).

Knapsack: Apply the recommended spray mix to give full coverage of leaves and stems.

The final volume of application should be similar to handgun.

A spray volume of 3 to 4 L/10 m² infested area should be used.

A spray volume of 2 L/10 m² should be used for an infested area infested with Galenia.

4. Controlled Droplet Application (Table 4): Results similar to high volume spraying can be obtained using Micron Herbi* or similar equipment. Select a nozzle to give a flow rate of 2 mL/sec and sweeping action to approximately 1 m/sec to ensure a droplet density to 20/cm². Use a marking agent, as recommended by the equipment manufacturers, to check the spray coverage. Also, consult directions provided with CDA unit.

5. Low Volume High Concentrate Application Techniques (Table 5): Good control will be achieved, similar to high volume application, where bush size enables good coverage of entire bush. Use a marking agent, as recommended by equipment manufacturers to check spray coverage.

Gas powered gun: Apply shots to obtain uniform coverage of 4 to 5 m² of surface area of bush. This relates to 20 droplets/cm² of leaf surface.

Sprinkler Sprayer: This technique involves using a micro sprinkler that is connected to a hollow fibre glass rod attached to a pneumatic knapsack sprayer. Use at low pressures (50 to 200 kPa) and apply with a slow seeping action over the top of the plants ensuring even coverage over the leaves.

6. Blanket Wiper Application (Table 6): Blanket needs to be made from durable and wettable material with a rigid backing. Blanket should be rigidly mounted behind motorised vehicle (e.g. tractor, 4-wheel drive vehicle) and set low but never touching the ground. The chemical solution should be fed to the blanket at a flow rate sufficient to keep the blanket wet but not dripping. In thick patches the blanket may require more frequent solution recharge (rewetting). Ideally, a scraper bar should be mounted in front of the blanket in order to scrape or damage the bark (but not sever the stems) prior to the blanket wiping the stems. This scraper may be mounted at the front of the vehicle. Two passes (in opposite direction) with the blanket increases the contact with the plant. Ground speeds of 10-15 km/h are ideal for blanket wiping application.

7. Stem Injection (Table 7): Treat only trees with good sap flow. Make injection cuts at 13 cm spacing around the diameter of the tree at waist height or at 15 cm spacing at ground level. The cuts should be made using a 5 to 7 cm wide narrow bladed axe. The cut must be made through the bark and deep enough to place all the chemical in contact with the sap wood. Treat each stem of a multistem tree where possible. Inject the chemical mix into each cut immediately after the cut is made. Apply the mix with a vaccinator or similar equipment which can be accurately calibrated or a tree injector which can apply the measured dose at or near ground level. Injection at or near ground level is essential in the Traprock area of south-eastern Queensland and is preferred for optimum results in Bimble Box (Poplar Box) areas.

Frilling: Make successive overlapping cuts into the sapwood around the entire circumference of the base of the tree. Spray to thoroughly wet the frilled area. Injecting

spray into centre of weed. Inject using a vaccinator or similar equipment, 1 mL of treatment mix into the growing point for each 2.5 cm of the plant stem diameter. (See Zamia Palm).
8. Cut Stump Application (Table 8): Cut the trees as close to the ground as practicable, leaving stumps no higher than 10 cm. Spray, swab or brush the chemical mix immediately to the freshly cut surface so as to thoroughly wet the surface. If the cut surface is oily, add a non-ionic wetting agent to assist penetration.

COMPATIBILITY

MACSPRED PICLORAM Herbicide is compatible with the following: (Read and follow all label directions, restraints, plant-back periods, withholding periods and safety directions on the partner label as well as those on the MACSPRED PICLORAM label.)

Broadleaf Herbicides: Farmozine, diquat, metosulam, Bronco 400, Clomac® 750 SG, Vortex, MCPA 750, LVE MCPA 570, Metmac® 600, Flagship, Flagship 400, 2,4-D Amine 625, Zulu Evo, Zulu XT, Triclopyr 600 EC, Triclopyr 750 EC, Glymac ® 360, Glymac ® 450, Glymac ® 510

Grass Herbicides: Rhino (Annual Ryegrass only), Mandate (Wild Oats and Phalaris only).

Adjuvants: Wetspray 1000, Uptake Spraying Oil (when mixed with Mandate).

Insecticides: Orbit and Dimethoate.

MACSPRED PICLORAM is not compatible with zinc products (such as zinc dextrose and zinc heptahydrate), copper salts (such as copper sulphate) and manganese sulphate. DO NOT use with hard water or water clarified with alum.

For compatibility information on products not listed above, please contact Macspred Australia.

CLEANING SPRAY EQUIPMENT

Rinsing: After using MACSPRED PICLORAM, empty the spray completely and drain the whole system. Thoroughly wash inside the unit using a pressure hose. Drain the spray unit, and clean any filters in the tank, pump, lines, hoses and nozzles. After cleaning the spray unit as above, quarter fill with clean water and circulate through the pump, lines, hoses and nozzles. Drain and repeat the rinsing procedure twice.

Decontamination: Before spraying cotton and other sensitive crops with equipment that has been used to apply MACSPRED PICLORAM Herbicide (see PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS section). Wash the tank and rinse the system as above. Then quarter fill the tank and add a standard alkali based laundry detergent at 500 g (or mL)/100 L water and circulate throughout the system for at least 15 minutes. If using a concentrated laundry detergent use 250 g (or mL)/100 L water. DO NOT use chlorine based cleaner. Drain the whole system. Remove filters and nozzles and clean them separately. Finally flush the system with clean water and allow to drain. Rinse water should be discharged onto a designated disposal area or, if this is unavailable, onto unused land away from desirable plants and watercourses.

Resistance Warning:	<p>RESISTANCE MANAGEMENT</p> <p>GROUP I HERBICIDE</p> <p>MACSPRED PICLORAM Herbicide is a member of the pyridine group of herbicides. The product has a disruptors of plant cell growth mode of action. For weed resistance management MACSPRED PICLORAM Herbicide is a Group I Herbicide. Some naturally occurring weed biotypes resistant to the product and other Group I herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by MACSPRED PICLORAM Herbicide or other Group I herbicides.</p> <p>Since the occurrence of resistant weeds is difficult to detect prior to use, Macspred Pty Ltd accepts no liability for any losses that may result from the failure of this product to control resistant weeds.</p> <p>Strategies to minimise the risk of herbicide resistance are available. Contact your farm chemical supplier, consultant, local Department of Agriculture, or local Macspred representative.</p>
---------------------	--

Precautions:	<p>RE-ENTRY PERIOD</p> <p>DO NOT enter treated areas until the spray has dried, unless wearing cotton overalls buttoned to the neck and wrist (or equivalent clothing) and chemical resistant gloves. Clothing must be laundered after each day's use.</p>
--------------	---

Protections:	<p>PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS</p> <p>Crops and plants susceptible to MACSPRED PICLORAM Herbicide include, but are not limited to clovers, medics, lucerne, lupins, navy beans, peas, soybeans and other legumes, cotton, flowers, hops, grape and kiwi fruit vines, ornamentals, potatoes, safflower, shade trees, sugar beet, tobacco, tomatoes, tree fruits and vegetables.</p> <p>This product will kill legumes (clovers, medics) present in the crop at the time of spraying. DO NOT apply close to or on areas containing roots of desirable vegetation, where treated soil may be washed to areas growing, or to be planted to desirable plants, or on sites where surface water from heavy rain can be expected to run off to areas containing or to be planted to susceptible crops or plants.</p> <p>DO NOT move soil, which may have been sprayed, to areas where susceptible crops or plants are to be grown.</p> <p>DO NOT apply MACSPRED PICLORAM Herbicide to pastures which are to be used for the production of compost or mulches for use with susceptible crops or plants. The use of straw, hay or other plant material treated with MACSPRED PICLORAM Herbicide for composting or mulching susceptible crops may damage these crops.</p> <p>Drift Warning</p> <p>DO NOT apply under weather conditions, or from spraying equipment, that may cause spray to drift onto nearby susceptible crops or plants, cropping lands or pastures.</p> <p>Avoid spray drift onto susceptible crops such as cotton, tobacco, tomatoes, vines, lupins, fruit trees and ornamentals.</p> <p>DO NOT use unless wind speed is more than 3 kilometres per hour and less than 15 kilometres per hour, as measured at the application site.</p> <p>DO NOT apply with smaller than COARSE to VERY COARSE spray droplets according to the ASABE S572 definition for standard nozzles.</p> <p>Equipment that has been used for application of MACSPRED PICLORAM Herbicide should not be used for application of other materials to susceptible plants until it has been decontaminated.</p> <p>PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT</p> <p>DO NOT contaminate streams, rivers or watercourses with the chemical or used containers.</p>
--------------	--

Storage and Disposal:	<p>Store in the closed, original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. Triple rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site.</p> <p>This container can be recycled if it is clean, dry, free of visible residues and has the drumMUSTER logo visible. Triple or pressure rinse container for disposal. Dispose of rinsate by adding to the spray tank. DO NOT dispose of undiluted chemicals on site. Wash outside of the container and the cap. Store cleaned container in a sheltered place with cap removed. It will then be acceptable for recycling at any drumMUSTER collection or similar container management site. The cap should not be replaced but may be taken separately. If not recycling, break, crush, or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations. DO NOT burn empty containers or product.</p> <p>110L:</p>
-----------------------	--

Store in the closed, original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. DO NOT tamper with the Micro Matic valve or the security seal. DO NOT contaminate the container with water or any foreign matter. After each use of the product, please ensure that the Micro Matic coupler delivery system and hoses are disconnected, triple rinsed with clean water and drained accordingly. When the contents of the container have been used, please return the container to the point of purchase. This container remains the property of Macspred Pty Ltd.

Refillable Containers:

Empty contents fully into application equipment. Close all valves and return to point of supply for refill or storage.

Safety Directions:	May irritate the eyes. Avoid contact with eyes. Repeated exposure may cause allergic disorders. When opening the container and using the product wear cotton overalls buttoned to the neck and wrists, a washable hat and elbow-length chemical resistant gloves. Wash hands after use. After each day's use, wash gloves and contaminated clothing.
--------------------	--

First Aid Instructions:	If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26, New Zealand 1800 764 766.

Table 1: High Volume spot spraying in tank mix with Triclopyr 600 EC or 2,4-D Amine 625

AGRICULTURAL NON-CROP AREAS, COMMERCIAL AND INDUSTRIAL AREAS, FORESTS, PASTURES AND RIGHTS-OF-WAY				
WEEDS	WEED GROWTH CONTROLLED	STATE	RATE/100 L WATER	CRITICAL COMMENTS
African Boxthorn	Less than 2 m tall	All States	210 mL plus 250 mL Triclopyr 600 EC	Apply when bushes have good leaf cover, growth and no leaf fall.
Alkali Sida	Pre-flowering	Qld, NSW, ACT, Vic, WA Only	95 mL plus 145 mL 2,4-D Amine 625	
		SA only	45 mL plus 70 mL 2,4-D Amine 625	
Amsinckia (Yellow Burr Weed)	During rosette stage	Vic, SA only	25 mL plus 35 mL 2,4-D Amine 625	
Angophora spp.	1 to 3 m tall	All States	145 mL plus 175 mL Triclopyr 600 EC	
Apple-of-Sodom	Flowering to early fruiting	Vic only	205 mL plus 310 mL 2,4-D Amine 625	
		SA only	95 mL plus 145 mL 2,4-D Amine 625	
Artichoke Thistle	Late Winter to Spring before flowering	Vic only	65 mL plus 95 mL 2,4-D Amine 625	SA – Use double rate at flowering.
		SA only	40 mL plus 60 mL 2,4-D Amine 625	
Australian Blackthorn	Less than 2 m tall	All States	210 mL plus 250 mL Triclopyr 600 EC	Apply from late Spring to early Autumn.
Banksia spp.	1 to 3 m tall		145 mL plus 175 mL Triclopyr 600 EC	
Biddy Bush (Chinese Shrub) (Sifton Bush)	Autumn when actively growing	NSW, ACT Only	210 mL plus 250 mL Triclopyr 600 EC	Add a 100% concentrate non-ionic surfactant (e.g. Wetspray® 1000) at the rate of 125 mL/100 L of water for best results.
Bindweed	Double budding	Qld, NSW, ACT, Vic, SA, WA only	405 mL plus 625 mL 2,4-D Amine 625	
Blackberry	December-January	Vic only	405 mL plus 625 mL 2,4-D Amine 625	Spray regrowth in Autumn.

Blackberry in association with: Docks, Ragwort, Smartweed, Thistles	Late Spring to Autumn	All States	145 mL plus 175 mL Triclopyr 600 EC OR 210 mL plus 250 mL Triclopyr 600 EC	Use the higher rate on plants which have been damaged by grazing stock or insects and on known difficult to kill Blackberry. Where herbicides other than Group I herbicides have been used, allow two seasons regrowth to occur before respraying with MACSPRED PICLORAM.
Black Knapweed	December-January	Vic only	205 mL plus 310 mL 2,4-D Amine 625	Spray plant and soil for 1 m around base of plant.
Bladder Campion	August Pre-flowering	SA only		
Blue Heliotrope	Flowering	Qld, NSW, ACT Only	210 mL plus 250 mL Triclopyr 600 EC	Apply in a minimum spray volume of 1250 L/ha.
Boneseed (Bitou Bush)	Flowering to fruiting	Qld, NSW, ACT, Vic, SA, WA only	205 mL plus 310 mL 2,4-D Amine 625	Treat freshly cut stumps with 1 L/10 L water at any time.
Borreria (Square Weed)		Qld only	45-95 mL plus 70-145 mL 2,4-D Amine 625	Use higher rate on older plants. Add Wetspray 1000 at the rate of 100 mL/100 L of water.
Boxthorn, African	Prior to bud burst	Qld, NSW, ACT, Vic, WA Only	405 mL plus 625 mL 2,4-D Amine 625	Treat small plants only. Thorough coverage essential. Spray soil to drip line.
Broom, Cape	Prior to pod formation	SA only	95 mL plus	Thoroughly wet foliage and soil around base of plant.
Broom, English		Vic, SA only	145 mL 2,4-D Amine 625	
Brooms: Cape, English, Flax Leaf, Montpellier	Spring to mid-Summer prior to pod formation	All States	105 mL plus 125 mL Triclopyr 600 EC	Apply as a thorough foliage spray.
	Autumn to Winter		145 mL plus 175 mL Triclopyr 600 EC	
Burr Ragweed		Qld only	205 mL plus 310 mL 2,4-D Amine 625	
Californian (perennial) Thistle	During budding stage	Qld, NSW, ACT, Vic, SA, WA only	205 mL plus 310 mL 2,4-D Amine 625	
Camphor Laurel	Less than 2 m tall	All States	145 mL plus 175 mL Triclopyr 600 EC	Apply as a thorough foliage spray.
	Above 2 m tall		210 mL plus 250 mL Triclopyr 600 EC	
Camel thorn		Vic, SA only	405 mL plus 625 mL 2,4-D Amine 625	
Cape Honeyflower	At flowering stage	Qld, NSW, ACT, Vic, SA, WA only	205 mL plus 310 mL 2,4-D Amine 625	
Casuarina spp.	1 to 3 m tall	All States	145 mL plus 175 mL Triclopyr 600 EC	Apply as a thorough foliage spray.
Chilean or Green Cestrum	During full leaf	Qld, NSW, ACT,	205 mL plus 310 mL 2,4-D Amine 625	

		Vic, SA, WA only		
Chinese Apple	Less than 2 m tall	Qld, WA only	145 mL plus 175 mL Triclopyr 600 EC	Add Wetspray 1000 at the rate of 100 mL/100 L of water for best results.
Chinese Scrub	Autumn	Vic only	205 mL plus 310 mL 2,4-D Amine 625	
Cockspur Thorn	Spring to Autumn	Qld, NSW, ACT Only	145 mL plus 175 mL Triclopyr 600 EC	Apply as a thorough foliage spray.
Colocynth	Seedling and established plants	Qld, NSW, ACT, Vic, SA, WA only	95 mL plus 145 mL 2,4-D Amine 625	
Common Sensitive Plant	Any time when actively growing	Qld, WA, NT Only	85 mL plus 100 mL Triclopyr 600 EC	To avoid leaves closing during application, spray plants while moving forward. Add Wetspray 1000 at the rate of 100 mL/100 L of water for best results.
Crofton Weed	Spring to Autumn	Qld, NSW, ACT, Vic, SA, WA only	145 mL plus 175 mL Triclopyr 600 EC	Apply as a thorough foliage spray.
	All stages	Vic, SA, WA only	205 mL plus 310 mL 2,4-D Amine 625	
Cut Leaf Mignonette	Before flowering	SA only	205 mL plus 310 mL 2,4-D Amine 625	
Devil's Fig		Qld, NSW, ACT, Vic, SA, WA only	205 mL plus 310 mL 2,4-D Amine 625	
Docks	Full leaf to early flowering	Qld, NSW, ACT, Vic, SA, WA only	25-45 mL plus 35-70 mL 2,4-D Amine 625	Use lower rate on seedlings only.
Dog Rose	During Summer	SA only	205 mL plus 310 mL 2,4-D Amine 625	
Eastern Cotton Bush <i>(Maireana amicrophylla)</i>	Spring to Autumn	Qld, NSW, ACT Only	210 mL plus 250 mL Triclopyr 600 EC	Add Uptake Spraying Oil at 500 mL/100 mL of water. Some bushes may require a follow-up spray to control regrowth.
<i>Eucalyptus</i> spp.	Seedling and regrowth from small lignotubers, 1 to 3 m tall	All States	145 mL plus 175 mL Triclopyr 600 EC OR 210 mL plus 250 mL Triclopyr 600 EC	Apply the higher rate where difficult to control species of <i>Eucalyptus</i> regrowth is present. Addition of an adjuvant may improve results contact Macspray for details.
		Qld, NSW, ACT, Vic, SA, WA only	205 mL plus 310 mL 2,4-D Amine 625	DO NOT treat seedlings more than 2.0 m high.
Galenia	Fresh growth in Spring to Summer	NSW, ACT Only	210 mL plus 250 mL Triclopyr 600 EC	Use 2000 L of spray mixture/ha.
Garlic, Wild		Vic only	95 mL plus	

	Before new bulbils form		145 mL 2,4-D Amine 625	
		SA only	80 mL plus 120 mL 2,4-D Amine 625	
Giant Bramble	Spring to Autumn	Qld, WA, NT only	210 mL plus 250 mL Triclopyr 600 EC	Penetration of thick clumps may be difficult and respraying may be necessary. Add Wetspray 1000 at the rate of 100 mL/100 L of water for best results.
Golden Thistle	Seedling and rosette stage	Qld, NSW, ACT, SA, WA only	95 mL plus 145 mL 2,4-D Amine 625	
		Vic only	155 mL plus 240 mL 2,4-D Amine 625	
Gorse (<i>Ulex europaeus</i>)	1 to 5 m tall	All States	104 mL plus 125 mL Triclopyr 600 EC	Spring and Summer treatment only. Add Wetspray 1000 at the rate of 100 mL/100 L of water for best results.
	Over 1.5 m tall or Autumn treatment		145 mL plus 175 mL Triclopyr 600 EC	
Gorse – Cont. (<i>Ulex europaeus</i>)	Winter treatment	All States	210 mL plus 250 mL Triclopyr 600 EC	Brownout may not be complete until Summer. Add Wetspray 1000 at the rate of 100 mL/100 L of water for best results.
	Spring treatment	Vic only	155 mL plus 240 mL 2,4-D Amine 625	
Green Cestrum	Late Spring to early Autumn	Qld, NSW, ACT only	210 mL plus 250 mL Triclopyr 600 EC	One application may give satisfactory control. Any subsequent regrowth and seedlings must be resprayed at approximately 1 metre high.
	Over 1.5 m tall			
Groundsel Bush (<i>Baccharis halimifolia</i>)	1 to 5 m tall in Spring and Summer	All States	105 mL plus 125 mL Triclopyr 600 EC	Apply as a thorough foliar spray.
	Over 1.5 m tall or Autumn treatment		145 mL plus 175 mL Triclopyr 600 EC	
		Qld, NSW, ACT only	205 mL plus 310 mL 2,4-D Amine 625	
Hawthorn	Less than 2 m tall	All States	210 mL plus 250 mL Triclopyr 600 EC	Apply from late Spring to early Autumn.
Heliotrope, Blue		Qld, NSW, ACT only	315 mL plus 480 mL 2,4-D Amine 625	Apply as a thorough foliar spray.
Hoary Cress	Rosette to pre-flowering	SA only	405 mL plus 625 mL 2,4-D Amine 625	
Horehound	Pre-flowering	All States	145 mL plus 175 mL Triclopyr 600 EC	
Inkweed	During full leaf	Qld, NSW, ACT, Vic, SA, WA Only	155 mL plus 240 mL 2,4-D Amine 625	
Japanese Sunflower	Pre-flowering	Qld, NSW, ACT only	145 mL plus 175 mL Triclopyr 600 EC	Apply as a thorough foliar spray.
Khaki Weed	During full leaf in Summer	Qld, NSW, ACT, Vic, SA, WA Only	205 mL plus 310 mL 2,4-D Amine 625	

Knapweed, Creeping	During late Spring to Summer	Vic, SA only	405 mL plus 625 mL 2,4-D Amine 625	
		Qld, NSW, ACT, WA Only	405-625 mL plus 625-960 mL 2,4-D Amine 625	
Lantana (<i>Lantana camara</i>) (<i>Lantana montevidensis</i>)	Up to 1 m tall in Summer to Autumn	All States	145 mL alone or plus 175 mL Triclopyr 600 EC	Add one of the following adjuvants: Uptake Spraying Oil at 0.5% v/v. Pulse Penetrant at 0.1% v/v. Thoroughly wet foliage, stems and soil around the base of the plants. Use higher rate on known harder to kill varieties. Use the combination with Triclopyr 600 EC or 2,4-D Amine 625 for faster burndown.
	1 to 2 m tall in Summer to Autumn		210 mL alone or plus 250 mL Triclopyr 600 EC OR 315 mL alone or plus 375 mL Triclopyr 600 EC	
Lantana – Cont. (<i>Lantana camara</i>) (<i>Lantana montevidensis</i>)	March-May	Qld, NSW, ACT, Vic, SA, WA Only	205 mL alone or plus 310 mL 2,4-D Amine 625	Add one of the following adjuvants: Uptake Spraying Oil at 0.5% v/v. Pulse Penetrant at 0.1% v/v. Thoroughly wet foliage, stems and soil around the base of the plants. Use higher rate on known harder to kill varieties. Use the combination with Triclopyr 600 EC or 2,4-D Amine 625 for faster burndown.
Limebush	Any time of year with good leaf cover and soil moisture	Qld, NT only	145 mL plus 175 mL Triclopyr 600 EC	Penetration of thick clumps may be difficult and respraying may be required. Addition of an adjuvant may improve results. Contact Macspray for details.
		Qld only	405 mL plus 625 mL 2,4-D Amine 625	Thorough coverage to point of run-off.
Lion Tail (<i>Leonatis nepetifolia</i>)	Pre-flowering	Qld only	85 mL plus 100 mL Triclopyr 600 EC	Apply as a thorough foliar spray. Add Wetspray 1000 at the rate of 100 mL/100 L of water for best results.
Manuka	At flowering	Vic only	210 mL plus 250 mL Triclopyr 600 EC	For optimum results, add Pulse Penetrant at 200 mL/100 L of spray. Thoroughly wet foliage, stems and soil around the base of the plants.
Mayne's Pest		Qld only	190 mL plus 290 mL 2,4-D Amine 625	Thorough coverage essential.
Mesquite (<i>Prosopis</i> spp.) <i>Prosopis velutina</i>	Seedling, full leaf and flowering before podding	Qld, NSW, ACT, WA, NT only	145 mL plus 175 mL Triclopyr 600 EC	DO NOT spray plants bearing pods. Add Wetspray 1000 at the rate of 100 mL/100 L of water for best results.
		Qld only	280 mL plus 340 mL Triclopyr 600 EC	
Mistflower	Spring to Autumn	Qld, NSW, ACT only	145 mL plus 175 mL Triclopyr 600 EC	Apply as a thorough foliar spray.
		Qld, NSW, ACT, Vic, SA, WA Only	205 mL plus 310 mL 2,4-D Amine 625	
Mother-of-millions	Flowering	Qld, NSW, ACT only	210 mL plus 250 mL Triclopyr 600 EC	Add Wetspray 1000 at the rate of 100 mL/100 L of water for best results.
Onion Weed	Pre-flower	Vic, SA only	25 mL plus 35 mL 2,4-D Amine 625 plus 125 mL diquat (200 g/L)	
Ox-eye Daisy	Up to early flowering	Vic only	45 mL plus 70 mL 2,4-D Amine 625	

Paddy's Lucerne	Active growth	NSW, ACT Only	210 mL plus 250 mL Triclopyr 600 EC	Plants that have been continually slashed or grazed over many seasons may be difficult to control and regrowth may occur.
Pampas Lily-of-the-valley		Vic, SA only	205 mL plus 310 mL 2,4-D Amine 625	
Parkinsonia	Under 2 m tall	Qld, WA, NT only	145 mL plus 175 mL Triclopyr 600 EC	Add Uptake Spraying Oil at 500 mL/100 L water. Avoid spraying under dry conditions when plants are stressed or bearing pods. Thoroughly wet foliage.
Parthenium Weed	During rosette stage	Qld, NSW, ACT only	40 mL plus 60 mL 2,4-D Amine 625	Use at least 3000 L diluted spray/ha in dense Parthenium.
Paterson's Curse (Salvation Jane)	Rosette to pre-flowering	Qld, NSW, ACT, Vic, SA, WA Only	45 mL plus 70 mL 2,4-D Amine 625	
Prairie Ground Cherry	Flowering to fruiting	Vic only	95 mL plus 145 mL 2,4-D Amine 625	Retreatment will be necessary.
Prickly Pear (common), Smooth Tree Pear	Active phyllode growth	All States	210 mL plus 250 mL Triclopyr 600 EC	Apply as a thorough foliar spray. Regrowth may occur, so a follow-up application may be necessary.
Quena (Tomato Weed)		Qld, NSW, ACT, Vic, SA, WA Only	205 mL plus 310 mL 2,4-D Amine 625	
Ragwort	Rosette to cabbage stage	Qld, NSW, ACT, Vic, WA only	95 mL plus 145 mL 2,4-D Amine 625	
		SA only	45 mL plus 70 mL 2,4-D Amine 625	
Rubber Vine (Not infected with rust)	Up to 1.5 m tall at flowering	Qld, WA, NT only	145 mL plus 175 mL Triclopyr 600 EC	Spray all leaves and stems just to the point of run-off and thoroughly spray the base of the plant. With larger, more dense stands, regrowth may occur. Subsequent control of any regrowth should be done by basal bark spraying.
	Dense stands greater than 1.5 m tall at flowering		210 mL plus 250 mL Triclopyr 600 EC	
	All stages	Qld only	405 mL plus 625 mL 2,4-D Amine 625	Thoroughly wet leaves and soil around the base of the plant. Cut and spray stump of large plants. See GENERAL INSTRUCTIONS, APPLICATION section.
Siam Weed	Active growth	Qld, WA only	145 mL plus 175 mL Triclopyr 600 EC	Add Wetspray 1000 at the rate of 100 mL/100 L of water for best results.
St John's Wort	From flowering to early seed set	All States	210 mL plus 250 mL Triclopyr 600 EC	Late Spring to early Summer.
	Late Spring to early Summer, during flowering to early seed set	Qld, NSW, ACT, Vic, SA only	155 mL plus 240 mL 2,4-D Amine 625	High Volume: Apply by calibrated handgun with D5 or D6 (2-3 mm) nozzle plate and operated at 400- 500 kpa (60-70 psi). Apply 3000 L/ha (i.e. 3 L/10 square metres) to dense infestations. Regrowth and seedlings may be retreated the following season.
Sicklepod	Up to flowering	Qld, WA, NT only	85 mL plus 100 mL Triclopyr 600 EC	DO NOT apply to podding plants. Add Wetspray® 1000 at the rate of 100 mL/100 L of water for best results.
		Qld, NT only	95 mL plus 145 mL 2,4-D Amine 625	May be applied using an aircraft using at least 50 L/ha of water or ground boom using at least 200 L/ha of water (see APPLICATION SECTION). Always add Uptake Spraying oil at 1 L/200 L, or add Wetspray 1000 at the rate of 200 mL/200 L of spray mixture.

				In pastures a repeat spray may be necessary for control of subsequent seedling germination.
Silverleaf Nightshade		NSW, ACT, Vic, SA only	205 mL plus 310 mL 2,4-D Amine 625	
Skeleton Weed	Summer and Autumn	Qld, NSW, ACT, WA Only	405-625 mL plus 625-960 mL 2,4-D Amine 625	
	Winter	Vic, SA only	205 mL plus 310 mL 2,4-D Amine 625	Young rosette or seedling plants up to 8 true leaves.
Smart Weed	Seedling to pre-flowering	Qld, NSW, ACT, Vic, SA, WA Only	45 mL plus 70 mL 2,4-D Amine 625	
Spiny Broom	During full leaf stage	Vic only	205 mL plus 310 mL 2,4-D Amine 625	
Spiny Emex (Doublegee)		Qld, NSW, ACT, Vic Only	95 mL plus 145 mL 2,4-D Amine 625	Young rosette or seedling plants up to 8 true leaves.
Star Thistle	Seedling to rosette	Qld, NSW, ACT, Vic, SA, WA Only	95-155 mL plus 145-240 mL 2,4-D Amine 625	Use higher rates for older plants.
Sweet Briar (<i>Rosa rubiginosa</i>)	Up to 1.5 m tall	All States	145 mL plus 175 mL Triclopyr 600 EC	Add Wetspray 1000 at the rate of 100 mL/100 L of water for best results. Full leaf to ripe fruit prior to leaf fall. Thorough wetting including the crown is recommended.
	Full leaf to ripe fruit	Qld, NSW, ACT, Vic, SA, WA Only	205 mL plus 310 mL 2,4-D Amine 625	Spray thoroughly.
Tangled Hypericum		Vic only	205 mL plus 310 mL 2,4-D Amine 625	
Thornapple (<i>Datura</i> spp.)		Qld, NSW, ACT only	45-95 mL plus 70-145 mL 2,4-D Amine 625	Use higher rates for older plants.
Tobacco Weed	Actively growing plants	Qld, WA, NT only	125 mL plus 150 mL Triclopyr 600 EC	Add Wetspray 1000 at the rate of 100 mL/100 L of water for best results.
Tree-of-Heaven	Plants during full leaf up to 1.5 m high	Qld, NSW, ACT, Vic, SA, WA Only	205 mL plus 310 mL 2,4-D Amine 625	
Tufted Honeyflower	All growth stages	Vic only	205 mL plus 310 mL 2,4-D Amine 625	
Tutsan	During leaf fall	Vic only	205 mL plus 310 mL 2,4-D Amine 625	Results can be variable.
Variegated Thistle	Rosette to pre-flowering	Qld, NSW, ACT, Vic, SA, WA Only	45-95 mL plus 70-145 mL 2,4-D Amine 625	Use higher rate on mature plants

Wattle (<i>Acacia</i> spp.) (except Corkwood Wattle)	1 to 3 m tall	All States	145 mL plus 175 mL Triclopyr 600 EC	
Wild Rosemary (<i>Cassinia laevis</i>)	Active growth, 0.5 to 1.0 m tall	Qld only	145-210 mL plus 175-250 mL Triclopyr 600 EC	Use lower rate on seedlings 0.5 tall. Apply as a thorough foliar spray.
Wild Tobacco Tree	Spring to Autumn up to 2 m tall	Qld, NSW, ACT only	145 mL plus 175 mL Triclopyr 600 EC	
	During full leaf	Qld only	205 mL plus 310 mL 2,4-D Amine 625	

Table 2: Boom Application for use with Triclopyr 600 EC or 2,4-D Amine 625

AGRICULTURAL NON-CROP AREAS, COMMERCIAL AND INDUSTRIAL AREAS, FORESTS, PASTURES AND RIGHTS-OF-WAY				
WEEDS	WEED GROWTH CONTROLLED	STATE	RATE/ha	CRITICAL COMMENTS
Alkali Sida	Pre-flowering	Qld, NSW, ACT, Vic, SA, WA Only	1.1 L plus 1.7 L 2,4-D Amine 625	
<i>Amaranthus</i> spp.		Qld, NSW, ACT only	315 mL plus 480 mL 2,4-D Amine 625	May be applied using an aircraft or ground boom (see APPLICATION SECTION). This rate will provide control of weeds present at the time of application and residual control of later germinations.
Amsinckia (Yellow Burr Weed)	During rosette stage	Vic, SA only	625 mL plus 960 mL 2,4-D Amine 625	
Annual Ground Cherry		Qld, NSW, ACT only	315 mL plus 480 mL 2,4-D Amine 625	
Artichoke Thistle	Late Winter to Spring before flowering	Vic only	2.35 L plus 3.6 L 2,4-D Amine 625	
		SA only	780 mL plus 1.2 L 2,4-D Amine 625	SA – Use double rate at flowering.
Bathurst Burr, Bellvine		Qld, NSW, ACT only	315 mL plus 480 mL 2,4-D Amine 625	Young rosette or seedling plants up to 15 cm in height or diameter.
Bindweed	During budding	Qld, NSW, ACT, Vic, SA, WA Only	2.35 L plus 3.6 L 2,4-D Amine 625	
Bladder Ketmia		Qld, NSW, ACT only	95 mL plus 520 mL 2,4-D Amine 625	
Borreria (Square Weed)	Flowering to fruiting	Qld only	315-780 mL plus 480 mL-1.2 L 2,4-D Amine 625	Use higher rate on older plants. Add Wetspray 1000 at the rate of 100 mL/100 L of water for best results.
Caltrop (Yellow Vine)		Qld, NSW, ACT only	95 mL plus 520 mL 2,4-D Amine 625	
Camel Thorn		Vic only	9.4 L plus 14.4 L 2,4-D Amine 625	
Climbing Buckwheat (Black Bindweed)	Early growth stage	Qld, NSW, ACT only	95 mL plus 145 mL 2,4-D Amine 625	For best control of Climbing Buckwheat apply early as this weed becomes increasingly difficult to control as it becomes larger.

Cobbler's Peg				
Fat Hen		Qld, NSW, ACT only	315 mL plus 480 mL 2,4-D Amine 625	Young rosette or seedling plants up to 25 cm in height or diameter. May be applied using an aircraft or ground boom (see APPLICATION SECTION). This rate will provide control of Fat Hen present at the time of application and residual control of later germinations.
Galenia	Fresh growth during Spring to Summer	NSW, ACT Only	2.1 L plus 2.5 L Triclopyr 600 EC	Rough mine sites will require adequate spray equipment such as boomless nozzles for effective coverage.
Garlic, Wild	Before new bulbils form	Vic only	2.35 L plus 3.6 L 2,4-D Amine 625	
		SA only	1.7 L plus 2.65 L 2,4-D Amine 625	
Golden Thistle	Seedling and rosette stage	Qld, NSW, ACT, SA, WA only	1.1 L plus 1.7 L 2,4-D Amine 625	
		Vic only	1.25 L plus 1.9 L 2,4-D Amine 625	
Heliotrope, Common		Qld, NSW, ACT only	95 mL plus 145 mL 2,4-D Amine 625	
Hexham Scent		Qld, NSW, ACT only	95 mL plus 520 mL 2,4-D Amine 625	Young rosette or seedling plants up to 8 true leaves.
Knapweed, Creeping	During late Spring to Summer	Vic only	2.35 L plus 3.6 L 2,4-D Amine 625	
Lucerne		Qld, NSW, ACT only	315 mL plus 480 mL 2,4-D Amine 625	
Mexican Poppy		Qld, NSW, ACT only	95 mL plus 520 mL 2,4-D Amine 625	Young rosette or seedling plants up to 8 true leaves.
Mintweed		Qld only	315 mL plus 480 mL 2,4-D Amine 625	
Morning Glory		Qld, NSW, ACT only	95 mL plus 520 mL 2,4-D Amine 625	
Mustards		Qld, NSW, ACT only	315 mL plus 480 mL 2,4-D Amine 625	
New Zealand Spinach		Qld, NSW, ACT only	315 mL plus 480 mL 2,4-D Amine 625	May be applied using an aircraft or ground boom (see APPLICATION SECTION). This rate will provide control of weeds present at the time of application and residual control of later germinations.
Noogoora Burr		Qld, NSW, ACT only	625 mL plus 960 mL 2,4-D Amine 625 plus 3L Diquat (200 g/L)	
Onion Weed	Pre-flower	Vic, SA only	315 mL plus 480 mL 2,4-D Amine 625 plus 3L Diquat (200 g/L)	
Ox-eye Daisy	Up to early flowering	Vic only	315 mL plus 480 mL 2,4-D Amine 625	Respraying will be necessary.
Parthenium Weed	During rosette stage	Qld, NSW, ACT only	940 mL plus 1.45 L 2,4-D Amine 625	May be applied using an aircraft or ground boom (see APPLICATION SECTION). This rate will provide control of weeds present at the time of application and residual control of later germinations.
Paterson's Curse (Salvation Jane)	Rosette to pre-flowering	SA only	1.25 L plus 1.9 L 2,4-D Amine 625	
Pigweed, Black		Qld, NSW,	315 mL plus 480 mL	
Potato Weed		Qld, NSW,	315 mL plus 480 mL	

		ACT only	2,4-D Amine 625	
Prairie Ground Cherry	Flowering to fruiting	Vic only	2.35 L plus 3.6 L 2,4-D Amine 625	Retreatment will be necessary.
Radish Wild	Young rosette or seedling plants up to 8 true leaves	Qld, NSW, ACT only	95 mL plus 520 mL 2,4-D Amine 625	
Ragwort	Rosette to cabbage stage	Qld, NSW, ACT, WA Only	1.1 L plus 1.68 L 2,4-D Amine 625	
		Vic, SA only	1.25 L plus 1.9 L 2,4-D Amine 625	
Redroot (<i>Amaranthus</i> spp.) Redshank		Qld, NSW, ACT only	315 mL plus 480 mL 2,4-D Amine 625	May be applied using an aircraft or ground boom (see APPLICATION SECTION). This rate will provide control of weeds present at the time of application, and residual control of later germinations.
Saffron Thistle	Young rosette or seedling plants up to 8 true leaves		95 mL plus 145 mL 2,4-D Amine 625	
Sesbania Pea			315 mL plus 480 mL 2,4-D Amine 625	May be applied using an aircraft or ground boom (see APPLICATION SECTION). This rate will provide control of weeds present at the time of application, and residual control of later germinations.
Sicklepod	Up to flowering	Qld, NT only	1.25 L plus 1.5 L Triclopyr 600 EC	DO NOT apply to podding plants. Add Wetspray® 1000 at the rate of 100 mL/100 L of water for best results.
			220-470 mL plus 1.1-1.5 L 2,4-D Amine 625	May be applied using an aircraft in at least 50 L/ha of water or ground boom in at least 200 L/ha of water (see APPLICATION SECTION). Always add Uptake Spraying Oil at 1 L/200 L, or add Wetspray 1000 at the rate of 200 mL/200 L of spray mixture. Use 220 mL plus 1135 mL/ha 2,4-D Amine 625 when weeds are less than 50 cm tall. Use 315 mL plus 1280 mL/ha 2,4-D Amine 625 when weeds are 50 to 100 cm tall. Use 470 mL plus 1520 mL/h 2,4-D Amine 625 rate when weeds are more than 100 cm tall. In pastures a repeat spray may be necessary for control of subsequent seedling germination.

Silverleaf Nightshade		NSW, ACT, Vic, SA only	4.7 L plus 7.2 L 2,4-D Amine 625	
Skeleton Weed	Summer and Autumn	Qld only	95 mL plus 520 mL 2,4-D Amine 625	Young rosette or seedling plants up to 8 true leaves.
	Winter	Vic only		
		SA only	95 mL plus 520 mL 2,4-D Amine 625	
	Summer and Autumn	NSW, ACT, WA only	4.7-6.9 L plus 7.2-10.5 L 2,4-D Amine 625	
Sowthistle	During full leaf stage	Qld, NSW, ACT only	95 mL plus 145 mL 2,4-D Amine 625	
Spiny Emex (Doublegee)	Young rosette or seedling plants up to 8 true leaves.			
St John's Wort	Flowering to early seed set (Nov-Jan)	NSW, ACT only	835-1665 mL plus 1.0-2.0 L Triclopyr 600 EC	Use the higher rate on dense infestations and when longer residual control is required. Follow-up respraying will be required in the following
Star Thistle	Seedling to rosette	Qld, NSW, ACT only	1.1-2.35 L plus 1.7-3.6 L 2,4-D Amine 625	Use higher rate for older plants.
Stinking Roger			315 mL plus 480 mL 2,4-D Amine 625	May be applied using an aircraft or ground boom (see APPLICATION SECTION). This rate will provide control of weeds present at the time and residual control of later germinations.
Sunflower			95 mL plus 520 mL 2,4-D Amine 625	Young rosette or seedling plants up to 8 true leaves.
Thornapple (<i>Datura</i> spp.)			315 mL plus 480 mL 2,4-D Amine 625	May be applied using an aircraft or ground boom (see APPLICATION SECTION). This rate will provide control of weeds present at the time and residual control of later germinations.
Turnip Weed		Qld only	155 mL plus 520 mL 2,4-D Amine 625	Apply when weeds are actively growing.
Variegated Thistle	Rosette to pre-flowering	Vic, SA, WA only	625 mL-1.25 L plus 960 mL-1.92 L 2,4-D Amine 625	Use higher rate on mature plants.
		Qld, NSW, ACT only	95 mL plus 520 mL 2,4-D Amine 625	
Wandering Jew			315 mL plus 480 mL 2,4-D Amine 625	
Wireweed			95 mL plus 520 mL 2,4-D Amine 625	Suppression only – spray early.

Table 3: Aerial Application for use with Triclopyr 600 EC and/or 2,4-D Amine 625

AGRICULTURAL NON-CROP AREAS, COMMERCIAL AND INDUSTRIAL AREAS, FORESTS, PASTURES AND RIGHTS-OF-WAY				
WEEDS	WEED GROWTH CONTROLLED	STATE	RATE/ha	CRITICAL COMMENTS
Blackberry	Summer to Autumn	Qld, NSW, ACT, Vic, SA, WA Only	4.2 L plus 4.9 L Triclopyr 600 EC	Where herbicides other than Group I herbicides have been used, allow two seasons regrowth to occur before respraying with MACSPRED PICLORAM. Warning: Eucalyptus species up to 4 m may be killed if sprayed during this treatment. Mature trees which are 15 to 200 m tall may be partially defoliated but are likely to recover.

Gorse		Tas only		Helicopter application only.
Cockspur Thorn, Crofton Weed, Lantana, Mistflower	Late Autumn	Qld, NSW, ACT, NT only (helicopter only)	625 mL plus 750 mL Triclopyr 600 EC plus 6 L 2,4-D Amine 625	Spray with calibrated equipment using the half overlap opposite pass technique applying a minimum spray volume of 150 L/ha. Follow-up respraying will be required.
Lantana			4.2 L plus 4.9 L Triclopyr 600 EC	Helicopter application only.
Rubber Vine (Not infected with rust)	When flowering	Qld, NT only (helicopter only)	1.25-2.1 L plus 1.5-2.5 L Triclopyr 600 EC	Use rates will depend upon the density and height of the Rubber Vine stand. The higher rate should be used on dense stands, however, complete coverage and penetration may be difficult. Follow-up respraying will be required. Any regrowth should be sprayed with a suitable basal bark herbicide.
St John's Wort	Flowering to early seed set (Nov-Jan)	NSW, ACT only	1.7 L plus 2.0 L Triclopyr 600 EC	Helicopter application only. Follow-up spraying will be required in the following season.
Parkinsonia	Seedlings 1-2 m tall, or 12-24 months old	Qld, NT only (helicopter only)	1.25 L plus 1.5 L Triclopyr 600 EC	Add Uptake Spraying Oil at 1 L/ha.

Table 4: Controlled Droplet Application (for use with Triclopyr 600 EC)

See GENERAL INSTRUCTIONS – APPLICATION section for application method details

AGRICULTURAL NON-CROP AREAS, COMMERCIAL AND INDUSTRIAL AREAS, FORESTS, PASTURES AND RIGHTS-OF-WAY				
WEEDS	WEED GROWTH CONTROLLED	STATE	RATE	CRITICAL COMMENTS
Blackberry in association with: Docks, Ragwort, St John's Wort, Thistles	Summer to Autumn	All States	For each 1 L of water add 415 mL plus 500 mL Triclopyr 600 EC	One application may give satisfactory control but subsequent regrowth and seedlings should be re-sprayed after hardening off. Where herbicides other than Group I herbicides have been used, allow two seasons regrowth to occur before respraying with MACSPRED PICLORAM plus Triclopyr 600 EC.

Table 5: Low Volume High Concentration Application techniques (Gas Powered Gun, Sprinkler Sprayer) for use with Triclopyr 600 EC

See GENERAL INSTRUCTIONS – APPLICATION section for application method details

AGRICULTURAL NON-CROP AREAS, COMMERCIAL AND INDUSTRIAL AREAS, FORESTS, PASTURES AND RIGHTS-OF-WAY				
WEEDS CONTROLLED	WEED GROWTH CONTROLLED	STATE	RATE/10 L WATER	CRITICAL COMMENTS
Blackberry	Late Spring to Autumn	Qld, NSW, ACT, Tas, SA, WA Only	140 mL plus 175 mL Triclopyr 600 EC	Apply to actively growing bushes which are able to be sprayed on all sides. For larger bushes, the high volume application technique is recommended.
Camphor Laurel, Cockspur Thorn, Crofton Weed	Less than 1.5 m high	Qld, NSW, ACT only	210 mL plus 175 mL Triclopyr 600 EC	Apply to actively growing bushes which are able to be sprayed on all sides. For larger bushes, the high volume application technique is recommended.
Eucalyptus species	Seedlings up to 2 m tall	All States	140 mL plus 175 mL Triclopyr 600 EC	
Mistflower	Less than 1.5 m high	Qld, NSW only	210 mL plus 175 mL Triclopyr 600 EC	
Sweet Briar	1.5 m tall, full leaf to ripe fruit	NSW, ACT only		Gas Powered Gun only: Apply to actively growing bushes not more than 1.5 m tall that have not more than 5 stems from the crown.
St John's Wort	During flowering to early seed set	NSW, ACT, Vic, Tas only		Gas Powered Gun only: One application should provide control. Minor regrowth and seedlings may be retreated the following Summer.
Wild Tobacco Tree	Less than 1.5 m high	Qld, NSW, ACT only	210 mL plus 175 mL Triclopyr 600 EC	Apply to actively growing bushes which are able to be sprayed on all sides. For larger bushes,

				the high volume application technique is recommended.
--	--	--	--	---

Table 6: Blanket Wiper Application for use with Triclopyr 600 EC

See GENERAL INSTRUCTIONS – APPLICATION section for application method details

FALLOW				
WEEDS CONTROLLED	WEED GROWTH CONTROLLED	STATE	RATE	CRITICAL COMMENTS
Bitterbark <i>(Alstonia constricta)</i>	From Summer to end of Autumn	Qld only	For each 1 L of water add 85 mL plus 100 mL Triclopyr 600 EC Or use 2% solution for spot spray (e.g. 100 mL solution to 5 L water)	For use with blanket wipers only. For best results apply in Autumn to tall (>60 cm) plants using two opposite directional passes (up and back). Follow up “missed” plants with a spot spray application. These will be obvious after 6 weeks. Blanket wiper applications can be made in Summer when plants are smaller but follow up spot spraying may be necessary. DO NOT disturb (cultivate) the treated patches for at least 3 months. Best long term control is achieved when patches are left undisturbed for as long as possible after treatment (at least 6 months). Spot Spraying “missed” plants: thoroughly wet all stems and leaves without producing any solution run-off. Avoid any spray reaching the soil surface.

Table 7: Stem Injection Application

Dilute Rate: For each 1 L of water add 185 mL MACSPRED PICLORAM plus 280 mL 2,4-D Amine 625

See GENERAL INSTRUCTIONS – APPLICATION section for application method details

AGRICULTURAL NON-CROP AREAS, COMMERCIAL AND INDUSTRIAL AREAS, FORESTS, PASTURES AND RIGHTS-OF-WAY				
WEEDS CONTROLLED	WEED GROWTH STAGE	STATE	APPLICATION RATE	CRITICAL COMMENTS
<i>Eucalyptus</i> spp.	Seedling regrowth no more than 2 m high	Qld, NSW, Vic, SA, WA only	2 mL of diluted chemical per cut	Most timber regrowth can be controlled by cut stump application.
Zamia Palm	Anytime	Qld only	-	Inject 1 mL into growing point for every 2.5 cm of plant stem diameter.

Table 8 : Cut Stump Application

Rate: Mix 1 part MACSPRED PICLORAM with 4 parts 2,4-D Amine 625

See GENERAL INSTRUCTIONS – APPLICATION section for application method details

AGRICULTURAL NON-CROP AREAS, COMMERCIAL AND INDUSTRIAL AREAS, FORESTS, PASTURES AND RIGHTS-OF-WAY				
WEEDS CONTROLLED	WEED GROWTH STAGE	STATE	RATE/10L WATER	CRITICAL COMMENTS
<i>Eucalyptus</i> spp.	Seedling regrowth no more than 2 m high	Qld, NSW, Vic, SA, WA only	500 mL	Most timber regrowth can be controlled by cut stump application.
Hawthorn	During full leaf	Vic only	Undiluted	Apply undiluted to freshly cut stump.
Tree of Heaven		Qld, NSW, Vic, SA, WA only
