

Product Name: Daredevil 520 Herbicide  
APVMA Approval No: 87810/119465

|             |                         |
|-------------|-------------------------|
| Label Name: | Daredevil 520 Herbicide |
|-------------|-------------------------|

|                  |   |
|------------------|---|
| Signal Headings: | POISON<br>KEEP OUT OF REACH OF CHILDREN<br>READ SAFETY DIRECTIONS BEFORE OPENING OR USING |
|------------------|---|

|                         |  |
|-------------------------|--|
| Constituent Statements: | ACTIVE CONSTITUENT: 520g/L HALOXYFOP present as the haloxyfop-R-methyl ester |
|-------------------------|--|

|                 |                   |
|-----------------|-------------------|
| Mode of Action: | GROUP A HERBICIDE |
|-----------------|-------------------|

|                      |  |
|----------------------|--|
| Statement of Claims: | For the post-emergent control of a wide range of annual and perennial grass weeds in grain legume and oilseed crops, lucerne, medic and clover pasture and seed crops, forestry, bananas, citrus, grapes, pineapples, pome and stone fruit, pyrethrum, tropical fruit and nut crops as specified in the Directions for Use |
|----------------------|--|

|               |          |
|---------------|----------|
| Net Contents: | 1 - 20 L |
|---------------|----------|

|             |   |
|-------------|---|
| Restraints: | DO NOT apply to weeds which may be stressed (not actively growing) due to prolonged periods of extreme cold, moisture stress (waterlogged or drought affected), poor nutrition or previous herbicide treatment as reduced levels of control may result.<br>DO NOT spray if rain is likely to occur within 1 hour. |
|-------------|---|

|--------------------|--|

|                      |                                |
|----------------------|--------------------------------|
| Withholding Periods: | HARVESTING WITHHOLDING PERIOD: |
|----------------------|--------------------------------|

Canola, Chickpeas, Cotton, Cowpea, Faba beans, Field peas, Lentils, Linola, Linseed, Lupins, Mung beans, Navy beans, Peanuts, Soybeans, Sunflowers and Vetch: NOT REQUIRED WHEN USED AS DIRECTED  
 Medic and Clover seed crops: DO NOT HARVEST FOR 7 DAYS AFTER APPLICATION  
**STOCK FOOD WITHHOLDING PERIOD:**  
 Canola, Chickpeas, Cotton, Cowpea, Faba beans, Field peas, Lentils, Linola, Linseed, Lupins, Mung beans, Navy beans, Peanuts, Soybeans, Sunflowers and Vetch: DO NOT GRAZE OR CUT FOR STOCK FOR 28 DAYS AFTER APPLICATION  
 Lucerne: DO NOT GRAZE OR CUT FOR STOCK FOR 21 DAYS AFTER APPLICATION  
 Medic and Clover pasture: DO NOT GRAZE OR CUT FOR STOCK FOR 7 DAYS AFTER APPLICATION  
**COTTON GIN TRASH MUST NOT BE FED TO ANIMALS**

| Trade Advice: |  |
|---------------|--|

|                              |  |
|------------------------------|--|
| <b>General Instructions:</b> | <p><b>MIXING</b></p> <ul style="list-style-type: none"> <li>• Add water to the spray tank to 10cm above the level of agitation and ensure the agitation device is working vigorously (There must be a minimum of 100L of water in the tank before any pesticide is added).</li> <li>• If tank mixing, firstly add any soluble liquid formulations (e.g. Lontrel Herbicide) and allow agitation for approximately 1 minute.</li> <li>• Then add Daredevil 520 Herbicide at the pot where the agitation is the strongest (DO NOT add Daredevil 520 Herbicide through a strainer or sieve). Allow further agitation for 1 minute.</li> <li>• Half fill spray tank.</li> <li>• If using wettable powder or water dispersible granules, or other emulsifiable concentration formulations (e.g. Lorsban 750 WG or Le-Mat), these should be added after the Daredevil 520 Herbicide to the half full spray tank to ensure vigorous agitation.</li> <li>• Finally add Uptake Spraying Oil or approved alternate spraying oil/wetter (see section on spraying oils/wetters) and continue filling the tank to the required volume maintaining agitation at all times.</li> <li>• Only mix sufficient solution for immediate use. Daredevil 520 Herbicide and any other tank mixes should be applied immediately for best results.</li> </ul> <p><b>Spraying Oils/Wetters</b></p> <p>* Spraying Oils: It is essential to add an adjuvant to Daredevil 520 Herbicide. Best results will be achieved with Uptake Spraying Oil at 0.5L/100L of spray solution. Alternatively, other oils plus non-ionic wetter may be used. When other crop spraying oils are used, mix at 1.0L/100L and add a non-ionic wetter (surfactant) at 200mL/100Lof spray solution. Use of an oil is not always recommended. See Critical Comments for specific situation recommendations.</p> <p># Non-Ionic Wetters: When Uptake or other oils are not used, a 100% concentrate non-ionic wetting agent such as BS-1000 at 200mL/100L must be used along with the higher rate of Daredevil 520 Herbicide as specified in the Directions for Use.</p> <p>Where water volumes of less 50L/ha are used, DO NOT use less than 250mL/ha of Uptake or 500mL/ha for oils other than Uptake or less than 100mLof wetter.</p> <p><b>CANOLA, LUCERNE, MEDIC AND CLOVER PASTURES AND SEED CROPS</b></p> <p>When tank mixing Daredevil 520 Herbicide with Lontrel herbicides (canola only) or Broadstrike (lucerne, clover and medics), use Uptake Spraying Oil with lower rates of Daredevil 520 Herbicide or a wetting agent with the higher rates of Daredevil 520 Herbicide</p> |
|------------------------------|--|

unless otherwise specified. When mixing Daredevil 520 Herbicide with other broadleaf herbicides on these crops, DO NOT use an oil use a wetter instead.

#### **FIELD PEAS AND CANOLA**

The oil recommended is Uptake Spraying Oil. Hasten is also recommended for use with tank-mixtures of Daredevil 520 Herbicide and Select Herbicide.

For canola, Daredevil 520 Herbicide + Lontrel 750SG + Uptake Spraying Oil are compatible and selective to canola. This tank-mixture is also compatible with atrazine or simazine and selective to triazine tolerant canola.

#### **NAVY BEANS, PEANUTS AND SOYBEANS**

When mixing with Blazer or Basagran DO NOT add spraying oil to these mixtures. DO NOT use these tank-mixtures on cowpea.

#### **COMPATIBILITY – Ground Use Only**

Insecticides: dimethoate, endosulfan, Chlorfos 500EC Insecticide, Lorsban 750WG

Insecticide, omethoate

Herbicides: atrazine, Basagran, Blazer, Broadstrike Herbicide, Lontrel Herbicide, Lontrel 750SG, MCPA Ester (LVE) – (DO NOT exceed 700mL/ha of MCPA LVE), oryzalin, Select Herbicide, simazine, Starane 200 Herbicide

Fungicides: Dithane DF, Dithane Rainshield Fungicide

Trace elements: magnesium sulphate, zinc sulphate

Daredevil 520 Herbicide is not compatible with 2,4-D or MPA as sodium or amine salts.

#### **Aerial Use**

No product other than a recommended crop oil or wetter should be mixed with Daredevil 520 Herbicide when applied by air except for the addition of Lontrel Forestry Herbicide for use in forestry and Lontrel 750SG for use in canola only.

#### **APPLICATION**

Apply Daredevil 520 Herbicide in sufficient water to obtain good coverage. It should be applied by an accurately calibrated ground rig or aircraft delivering droplets with a VMD of 200-300 microns.

The following spray volumes are recommended:

Ground Application: 50-150 L/ha

Aerial application: 30 L/ha minimum

Use higher water volumes in orchards and in dense crops where the weeds may be shielded by the crop canopy.

#### **CLEANING SPRAY EQUIPMENT**

Before using Daredevil 520 Herbicide

If broadleaf herbicides, particularly sulfonylureas, have been used in the spray equipment at any time prior to the use of Daredevil 520 Herbicide. Particular care should be taken to follow the directions on the relevant broadleaf herbicide label for equipment cleaning, or damage to susceptible crops may occur.

After using Daredevil 520 Herbicide

Empty the tank and drain the whole system. Thoroughly wash inside the tank using a pressure hose, drain the tank and clean filters in the tank, pump line and nozzles.

To rinse: After cleaning the tank as above, quarter fill the tank with clean water and circulate through the pump, lines hoses and nozzles. Drain and repeat the rinsing procedure twice.

To decontaminate: Before spraying cereals, maize, sorghum or other sensitive crops, wash the tank and rinse the system as above. Then quarter fill the tank and add an alkali detergent (e.g. SURF, Cold Water SURF Concentrate, DynamoMatic Concentrate, OMO or Drive) at 500mL/100L of water or the powder equivalent at 500g/100L of water, and circulate throughout the system for at least 15 minutes. Drain the whole system. Remove filters and nozzles and clean separately. Finally flush the system with clean water and allow to drain. Chlorine based cleaners are not recommended. Rinse water should be discharged onto a designated disposal area, or if this is unavailable, onto unused land away from desirable plants and water sources.

|                     |  |
|---------------------|--|
| Resistance Warning: | <p><b>GROUP A HERBICIDE</b></p> <p>Daredevil 520 Herbicide is a member of the cyclohexanedione group of herbicides. Daredevil 520 Herbicide has the inhibition of acetyl CoA carboxylase mode of action. For weed resistance management, Daredevil 520 Herbicide is a Group A herbicide. Some naturally occurring weed biotypes resistant to Daredevil 520 Herbicide and other Group A herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by Daredevil 520 Herbicide or other Group A herbicides.</p> <p>Since the occurrence of resistant weeds is difficult to detect prior to use, Sunrise Crop Science Co., Ltd accepts no liability for any losses that may result from the failure of Daredevil 520 Herbicide to control resistant weeds.</p> |
|---------------------|--|

|              |  |
|--------------|--|
| Precautions: |  |
|--------------|--|

|              |  |
|--------------|--|
| Protections: | <p><b>PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS</b><br/> Daredevil 520 Herbicide damages cereals and grasses.<br/> DO NOT apply under weather conditions, or from spraying equipment, that may cause spray to drift onto nearby susceptible crops/plants, cropping lands or pastures.<br/> Cereal crops or grasses planted within 12 weeks of application may be damaged by the residual effects of Daredevil 520 Herbicide particularly on light and red soils.</p> <p><b>PROTECTION OF LIVESTOCK</b><br/> DO NOT graze or cut treated crops for stock food except as specified under withholding periods.</p> <p><b>PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT</b><br/> Daredevil 520 Herbicide is toxic to fish. DO NOT contaminate streams, rivers or waterways with the chemical or used containers.</p> |
|--------------|--|

|                       |  |
|-----------------------|--|
| Storage and Disposal: | <p><b>KEEP OUT OF REACH OF CHILDREN</b><br/> Store in the closed, original container in a dry, cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. DO NOT store near feedstuffs, fertilisers or seeds. Triple rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on-site.</p> <p>If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush, or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.</p> <p><b>SMALL SPILL MANAGEMENT</b><br/> Wear protective equipment (see SAFETY DIRECTIONS). Apply absorbent material such as earth, sand, cat litter or clay granules to the spill. When absorption is complete, sweep up material and contain in a refuse vessel for disposal (see STORAGE AND DISPOSAL section). If necessary wash the spill area with an alkali detergent and water and absorb this wash liquid for disposal as directed above.</p> |
|-----------------------|--|

|                    |  |
|--------------------|--|
| Safety Directions: | <p>Harmful if swallowed. Will irritate the eyes and skin. Avoid contact with eyes and skin. When opening container, preparing spray and using the prepared spray wear cotton overalls buttoned to the neck and wrist and washable hat, elbow-length PVC gloves and</p> |
|--------------------|--|

face shield or goggles. After each day's use, wash gloves and face shield or goggles and contaminated clothing. Wash hands after use.

|                         |  |
|-------------------------|--|
| First Aid Instructions: | If poisoning occurs contact a Doctor or phone the Australian Poisons Information Centre 13 11 26. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor. |
|-------------------------|--|

First Aid Warnings:

## DIRECTIONS FOR USE

**Table 1a. Winter crops – Canola, Chickpeas, Faba beans, Field peas, Lentils, Linola, Linseed, Lupins, Lucerne, Vetch, Medic and Clover pastures or seed crops**

| Weeds Controlled   | Weed Growth Stage | Rate (mL/ha)                          |                                    | Critical Comments   |
|--|-------------------|---------------------------------------|------------------------------------|---|
|  |                   | With Uptake <sup>1</sup> Spraying Oil | With non-ionic wetter <sup>2</sup> |   |
| Annual Ryegrass  | 2 to 4 leaf       | 75                                    | 100                                | <sup>1 2</sup> See GENERAL INSTRUCTIONS, Spraying oils/wetters section.   |
|  | early tillering   | 100                                   | 100                                |   |
| Barley grass<br>Brome grass<br>Paradoxa grass<br>Volunteer cereals | 2 to 4 leaf       | 50                                    | 75                                 | FIELD PEAS AND CANOLA: The only oil recommended for use with Daredevil 520 Herbicide is Uptake* Spraying Oil. Daredevil 520 Herbicide + Lontrel 750 SG + Uptake* Spraying Oil are compatible and selective to canola. This tank-mix is also compatible with atrazine and selective to triazine tolerant canola.   |
|  | early tillering   | 75                                    | 100                                |   |
| Wild Oats<br>WA, SA, VIC,<br>TAS, southern &<br>central NSW        | 2 to 4 leaf       | 37.5                                  | 50                                 | LUPINS AND FIELD PEAS: Mixtures with Brodal or simazine may cause crop yellowing and separate applications are recommended.   |
|  | early tillering   | 50                                    | 75                                 |   |
| Wild Oats<br>northern NSW &<br>QLD                                 | 2 to 4 leaf       | 50                                    | 75                                 | CHICKPEAS, FABA BEANS, LENTILS AND VETCH, LINOLA, LINSEED: Broadleaf herbicides should not be added to Daredevil 520 Herbicide. Apply Daredevil 520 Herbicide and broadleaf herbicides at least a week apart.   |
|  | early tillering   | 75                                    | 100                                |   |
|  |                   |                                       |                                    | LUCERNE, CLOVER OR MEDIC PASTURES: If grazed or cut for hay immediately prior to treatment delay application until all grasses have fully expanded leaves. Use 75 mL + spraying oil or 100 mL + wetter/ha. (See GENERAL INSTRUCTIONS, Spraying Oils/wetters section). If silver grass ( <i>Vulpia</i> spp.) is present in pasture, simazine should be tank mixed with the higher rate of Daredevil 520 Herbicide plus a non-ionic wetter. |

**Table 1b. Winter crop growth stage application windows**

| Crop  | Crop Growth Stage   |
|---|---|
| Lucerne, Medic and Clover pastures or seed crops          | Apply from 2 <sup>nd</sup> trifoliolate leaf onwards. For <i>Erodium</i> spp spraying, apply from cotyledon crop stage onwards.   |
| Canola, Linola, Linseed                                   | Apply from 2 leaf to 8 leaf stage of crop growth. DO NOT apply after the commencement of stem elongation. This means that application must not occur after the 8 leaf stage, or if stem elongation commences before the 8 leaf stage, application must not occur after stem elongation has commenced. |
| Chickpeas, Faba beans, Field peas, Lentils, Lupins, Vetch | Apply from 2 <sup>nd</sup> leaf, 2 <sup>nd</sup> node or 2 <sup>nd</sup> branch prior to flowering.   |

**Table 2a. Lucerne, Medic and Clover seed crops and pastures. See table 1b for crop stages.**

| Weeds Controlled  | Weed Growth Stage            | Rate (mL/ha) with Uptake <sup>1</sup> Spraying Oil | Critical Comments   |
|---|------------------------------|--|---|
| Prairie grass<br>( <i>Bromus catharticus</i> )  | Up to early tillering        | 100  | <sup>1</sup> See GENERAL INSTRUCTIONS, Spraying oils/wetters section.   |
| Musky or ferny leaf Storksbill:<br>( <i>Erodium moschatum</i> )<br>Common Crowsfoot or Common Storksbill<br>( <i>Erodium cicutarium</i> ) | Up to 6 leaf or 5cm diameter | 50 – 75 <sup>3</sup>                               | <sup>3</sup> Use lower rate when growing conditions and crop or pastures competition are good and when weed populations are below 100 plants/m <sup>2</sup> . Use the higher rate when weed populations are above 100 plants/m <sup>2</sup> or when crop or pasture competition is poor.  |
| Long or shiny leaf Storksbill ( <i>E. botrys</i> )  | Up to 8 leaf or 5cm diameter | 75 – 100   | NOTE: Storksbill may not be controlled if simazine or Broadstrike are tank-mixed with Daredevil 520 Herbicide.<br><br>LUCERNE, CLOVER OR MEDIC PASTURES<br>If grazed or cut for hay immediately prior to treatment delay application until all grasses have fully expanded leaves. Use 75mL + spraying oil or 100mL + wetter/ha. (See GENERAL INSTRUCTIONS, Spraying oils/wetter section). If Silver grass ( <i>Vulpia spp.</i> ) is present in pasture, simazine should be tank mixed with the higher rate of Daredevil 520 Herbicide plus a non-ionic wetter. |

**Table 2b. Lucerne, Medic and Clover seed crops only – not to be used for stockfeed. See table 1b for crop stages**

| Weeds Controlled                                  | Weed Growth Stage   | Rate (mL/ha) with Uptake <sup>1</sup> Spraying Oil | Critical Comments   |
|---|---------------------|--|---|
| Couch grass (suppression), Rhodes grass (control) | Tillering seedlings | 150 + 150 <sup>4</sup>                             | <sup>4</sup> For best suppression of couch or control of Rhodes grass, make 2 applications of Daredevil 520 Herbicide 2-4 weeks apart. Time second application to coincide with tillering stage of weeds and just after irrigation or significant rain. |
| Couch grass (control), Rhodes grass (control)     | Established stands  | 400 – 800  | Only treat actively growing weeds, which are not moisture stressed. Use these rates for control of couch and Rhodes grass.  |

**Table 3a. Summer Crops – Cotton, Cowpea, Lucerne, Mung bean, Navy beans, Peanuts, Soybeans, Sunflowers**

| Weeds Controlled  | Weed Growth Stage              | Rate (mL/ha) with Uptake <sup>1</sup> Spraying Oil | Critical Comments   |
|---|--------------------------------|--|---|
| Australian millet   | 2 leaf to tillering up to 15cm | 150  | <sup>1</sup> See GENERAL INSTRUCTIONS, Spraying oils/wetters section.   |
| Barnyard grass  | 2 to 5 leaf                    | 100  | NAVY BEAN, PEANUTS, SOYBEANS  |
|   | tillering up to 15cm           | 150  | For broadleaf weed control, Daredevil 520 Herbicide at 150ml/ha plus wetter may be tank mixed with Blazer® (except on Navy beans) or Basagran. Tank mixes may cause transient leaf spotting on the crop but do not normally affect yield. |
| Crowsfoot grass<br>Green Panic grass<br>Johnson grass (Rhizome)               | 2 leaf to tillering up to 15cm | 150  | DO NOT tank mix broadleaf herbicides with Daredevil 520 Herbicide if grasses have begun tillering or if the grasses are under moisture stress.  |
| Johnson grass (seedling)<br>Liverseed grass (seedling)<br>Mossman River grass | 2 to 5 leaf                    | 100  | DO NOT add Uptake Spraying Oil with Blazer or Basagran.   |
|   | tillering up to 15cm           | 150  | DO NOT use Blazer or Basagran tank-mixes on Cowpeas.  |
| Summer grass  | 2 leaf to tillering up to 15cm | 150  |   |
| Volunteer cereals   | 2 to 4 leaf                    | 100  |   |
|   | tillering up to 15cm           | 150  |   |

**Table 3b. Summer crop growth stage application windows**

| Crop                                     | Crop Growth Stage  |
|--|--|
| Lucerne                                  | Apply from 2 <sup>nd</sup> trifoliate leaf onwards               |
| Cowpea, Mung beans, Navy beans, Soybeans | Apply from 2 <sup>nd</sup> leaf to flowering                     |
| Peanuts                                  | Apply from 5cm to pegging  |
| Cotton                                   | Apply from 2 <sup>nd</sup> leaf to before the onset of flowering |
| Sunflowers                               | Apply from 2 <sup>nd</sup> leaf to head initiation               |
