

Product Name: Choice Camara 600 Herbicide
APVMA Approval No: 89401/129937

Label Name:	Choice Camara 600 Herbicide
Signal Headings:	POISON KEEP OUT OF REACH OF CHILDREN READ SAFETY DIRECTIONS BEFORE OPENING OR USING
Constituent Statements:	ACTIVE CONSTITUENT 600 g/L DICHLORPROP PRESENT AS THE POTASSIUM SALT
Mode of Action:	GROUP I HERBICIDE
Statement of Claims:	For the integrated control of all varieties of Lantana, Sicklepod, Wild Verbena, Phyla Weed (Lippia, Condamine Couch), Scotch/Spear Thistle, Harrisia Cactus, Smart Weed and Galvanised Burr as per the Directions for use table.
Net Contents:	1 L to 1000 L
Restraints:	Avoid spraying during periods of drought, extreme cold or if rain is likely within 4 hours of application.
Directions for Use:	This section contains file attachment.
Other Limitations:	
Withholding Periods:	

Trade Advice:	
---------------	--

General Instructions:	<p>GENERAL INSTRUCTIONS Before opening, carefully read Directions for Use, Precautionary Statements, Safety Directions and First Aid Instructions.</p> <p>For best results, Camara 600 should be applied when the Lantana and weeds listed are growing vigorously and preferably flowering. This is usually when the weather is warm and ample moisture is present in the soil. A further spray may be necessary to control regrowth or replace chemical wash off by sudden downpours. Complete coverage of all foliage is essential.</p> <p>MIXING INSTRUCTIONS Camara 600 is readily miscible with both hard and soft water. Add the required amount of this product to water in the spray tank and stir thoroughly.</p> <p>EQUIPMENT MAINTENANCE AND USE Equipment that has been used for this chemical should not be used for the application of other materials to sensitive plants, unless it has been well washed out with hot soapy water or 1% solution of ammonia, followed by several clear water rinses.</p>
-----------------------	--

Resistance Warning:	<p>RESISTANT WEEDS WARNING GROUP I HERBICIDE Choice Camara 600 Herbicide is a member of the phenoxy group of herbicides. Camara 600 has the disruptors of plant cell growth mode action. For weed resistance management Camara 600 is a Group I herbicide. Some naturally occurring weed biotypes resistant to Camara 600 and other disruptors of plant cell growth herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by Camara 600 or other Group I herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Grow Choice Pty Ltd accepts no liability for any losses that may result from the failure of Camara 600 to control resistant weeds.</p>
---------------------	--

Precautions:	<p>PRECAUTION RE-ENTRY PERIOD Do not re-enter treated area until spray is dried.</p>
--------------	--

Protections:	<p>PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS Drift Warning DO NOT spray in high winds. DO NOT spray crops or weeds outside the stages indicated in the Critical Comments as damage, loss of yield or inadequate weed control may result. DO NOT spray cereals if lucerne is present. DO NOT apply under weather conditions, or from spraying equipment, that may cause spray to drift onto nearby susceptible plants/crops, cropping lands or pastures. Avoid spray drift onto susceptible crops such as cotton, tobacco, tomatoes, lupins, ornamentals, vines, fruit trees, vegetables, legume crops and pastures, oilseed crops and susceptible trees (e.g. Kurrajongs, Belahs and Eucalypts).</p> <p>PROTECTION OF LIVESTOCK Low hazard to bees. May be applied at any time as recommended in the Directions for Use.</p> <p>PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT</p>
--------------	---

DO NOT contaminate streams, rivers or watercourses with the chemical or used containers.

Storage and Disposal:	<p>Store in the closed, original container in a cool, well ventilated area. DO NOT store for prolonged periods in direct sunlight.</p> <p>Triple-rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush, or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.</p> <p>For refillable containers: Empty contents fully into application equipment. Close all valves and return to point of supply for refill or storage.</p>
-----------------------	--

Safety Directions:	Will damage the eyes. May irritate the skin. Avoid contact with eyes and skin. When opening the product and preparing the spray, wear cottons overalls buttoned to the neck and wrist (or equivalent clothing) and face-shield or goggles. If product in eyes, wash it out immediately with water. Wash hands after use. After each days use, wash face shield, goggles and contaminated clothing.
--------------------	--

First Aid Instructions:	If poisoning occurs, contact a doctor or Poisons Information Centre Phone Australia 13 11 26; New Zealand 0800 764 766. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

First Aid Warnings:	
---------------------	--

DIRECTIONS FOR USE

Situation	Weeds Controlled	Rate	Critical Comments
Non-crop Rights of way	<i>Lantana</i> spp. including Creeping Lantana	1 L/200 L water	Completely wet all leaves and stems of target plants. For best results spray at flowering
		5 mL/1 L water	Knapsack rate. For best results spray at flowering.
		6-8 L/ha	Helicopter rate. For areas that are inaccessible to ground equipment spray by helicopter using raindrop nozzles in a minimum of 200 litres of water per hectare. Using the higher rate for mature plants. A follow up spray may be necessary.
	Sicklepod (<i>Cassia obtusifolia</i>) Morning Glory	1 L/200 L water	Completely wet all leaves and stems of target plants using a high volume spray.
	Wild Verbena Scotch/Spear Thistle Smart Weed	5 mL/1 L water	Knapsack rate.
	Galvanised Burr	1 L/100 L water with Spraymate Activator	Apply to actively growing young plants.
	Harrisia Cactus	1 L/60 L water	Good soil moisture essential and spray at fruiting.
	Phyla Weed (Lippia, Condamine Couch) Maynes Pest	1 L/200 L water	Completely wet all leaves and stems of target plants.
		5 L/ha	Boomspray using high water volumes – minimum 100 L/hectare. For best results spray at flowering.
		5 mL/1 L water	Knapsack rate.
