KENSO AGCARE

FLUROKEN

200

HERBICIDE

ACTIVE CONSTITUENT: 200 g/L FLUROXYPYR
present as the METHYLHEPTYL ESTER
SOLVENT: 580 g/L LIQUID HYDROCARBON

GROUP I HERBICIDE

For the control of a wide range of broadleaf weeds in fallow, lucerne, maize, millets, poppies, sorghum, sugar cane sweetcorn, winter cereals. Also for the control of woody weeds in agricultural non-crop areas, commercial and industrial areas, forests, pastures and right-of-way, as specified in the Directions For Use.

KENSO AGCARE FLUROKEN 200 HERBICIDE

STORAGE AND DISPOSAL

Store in the closed, original container in a dry, cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. Store in a locked room or place away from children, animals, food, feedstuffs, seed and fertilizers. Triple or preferably pressure rinses containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point.

If not recycling, break, crush or puncture and bury the empty containers in a local authority landfill. If no landfill is available, bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.

110L Mini Bulk Returnable Container (110L only)

Store the original sealed drum in a cool well-ventilated area. DO NOT store for prolonged periods in direct sunlight. DO NOT tamper with the Micro Matic valve or the security seal. DO NOT contaminate the drum with water or any foreign matter.

After each use of the product, please ensure that the Micro Matic coupler, delivery system and hoses are disconnected, triple rinsed with clean water and drained accordingly. When the contents of the drum have been used, please return the empty drum to the point of purchase. The drum remains the property of Kenso Corporation (M) Sdn Bhd.

Refillable containers (1000L only)

Store in the closed, original container in a cool, well ventilated area. DO NOT store for prolonged periods in direct sunlight. Empty contents fully into application equipment. Close all valves and return to point of supply for refill or storage.

SMALL SPILL MANAGEMENT

Wear protective equipment (See SAFETY DIRECTIONS). Apply absorbent material such as earth, sand, clay granules or cat litter to the spill. Sweep up material for disposal when absorption is completed and contain in a refuse

SAFETY DIRECTIONS

Avoid contact with eyes and skin. When opening the container, preparing the spray and using the prepared spray, wear cotton overalls buttoned to the neck and wrist and a washable hat, elbow length PVC gloves, a face shield or goggles. Wash hands after use. After each day's use wash gloves, face shield and contaminated clothing.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone (Phone Australia 13 11 26).

MATERIAL SAFETY DATA SHEET

Additional information is listed in the Material Safety Data Sheet.

CONDITIONS OF SALE

"Kenso Corporation (M) Sdn. Bhd." ("Kenso") shall not be liable for any loss injury damage or death whether consequential or otherwise whatsoever or howsoever arising whether through negligence or otherwise in connection with the sale supply use or application of this product. The supply of this product is on the express condition that the purchaser does not rely on Kenso's skill or judgement in purchasing or using the same and every person dealing with this product does so at his own risk absolutely. No representative of Kenso has any authority to add to or alter these conditions.

RESISTANT WEEDS WARNING GROUP I HERBICIDE

Fluroken 200 Herbicide is a member of the pyridine group of herbicides. The product has disrupters of plant cell growth mode of action. For weed resistance management the product is a Group I Herbicide.

Some naturally occurring weed biotypes resistant to the product and other disrupters of plant cell growth herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by this product or other disrupters of plant cell growth herbicides.

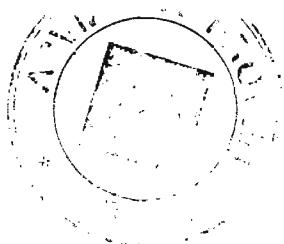

Since the occurrence of resistant weeds is difficult to detect prior to use, Kenso Corporation (M) Sdn Bhd accepts no liability for any losses that may result from the failure of this product to control resistant weeds.

Strategies to minimise the risk of herbicide resistance are available. Contact your farm chemical supplier, consultant, local Department of Agriculture, or Kenso Agcare local representative.

PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS

- Susceptible crops include but are not limited to clovers, cotton, fruit, hops, lupins, ornamentals, peas, pine tree, potatoes, navy beans, safflower, shade trees, soybeans, sunflower, tobacco, tomatoes, vegetables, and vines.
- Fluroken 200 can be damaging to susceptible crops during both growing and dormant periods.

Scale 1:1
100% to MPL

- Grasses are normally unaffected by Fluroken 200 and establish quickly after treatment. Transitory damage can occur on some species particularly those that spread by stolons such as couch grass (*Cynodon dactylon*), Kikuyu grass and carpet grass (*Axonopus sp.*).
- DO NOT allow spray to drift onto susceptible crops, shade trees and *Pinus spp.*
- DO NOT use under weather conditions or from spraying equipment, which could be expected to cause spray to drift onto nearby susceptible plants.

PROTECTION OF LIVESTOCK

- DO NOT graze or cut treated crops for stock food except as specified under withholding periods.
- Poisonous plants may become more palatable after spraying; therefore livestock should be kept out of the area until the plants have died down.
- DO NOT allow stock to re-enter paddocks containing treated poisonous plants, until the plants have died down.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

- DO NOT contaminate streams, rivers or waterways with the chemical or used containers.
- Alongside waterways, treat only noxious weeds and poisonous plants.

STORAGE AND DISPOSAL

Store in the closed, original container in a cool, well ventilated area. DO NOT store for prolonged periods in direct sunlight. Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.

110L Mini Bulk Returnable Container (110L only)

Store the original sealed drum in a cool well-ventilated area. DO NOT store for prolonged periods in direct sunlight. DO NOT tamper with the Micro Matic valve or the security seal. DO NOT contaminate the drum with water or any foreign matter.

After each use of the product, please ensure that the Micro Matic coupler, delivery system and hoses are disconnected, triple rinsed with clean water and drained accordingly. When the contents of the drum have been used, please return the empty drum to the point of purchase. The drum remains the property of Kenso Corporation (M) Sdn Bhd.

Refillable containers (1000L only):

Store in the closed, original container in a cool, well ventilated area. DO NOT store for prolonged periods in direct sunlight. Empty contents fully into application equipment. Close all valves and return to point of supply for refill or storage.

SMALL SPILL MANAGEMENT

Wear protective equipment (See SAFETY DIRECTIONS). Apply absorbent material such as earth, sand, clay granules or cat litter to the spill. Sweep up material for disposal when absorption is completed and contain in a refuse vessel for disposal. (See STORAGE AND DISPOSAL section). If necessary, wash the spill area with an alkali detergent and water and absorb as above the wash liquid for disposal.

SAFETY DIRECTIONS

Avoid contact with eyes and skin. When opening the container, preparing the spray and using the prepared spray, wear cotton overalls buttoned to the neck and wrist and a washable hat, elbow-length PVC gloves, a face shield or goggles. Wash hands after use. After each day's use wash gloves, face shield and contaminated clothing.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre (Phone 13 11 26). If swallowed, DO NOT induce vomiting. Give a glass of water.

MATERIAL SAFETY DATA SHEET

For further information refer to the Material Safety Data Sheet (MSDS).

CONDITIONS OF SALE

DIRECTIONS FOR USE:

RESTRAINTS:

- DO NOT apply to plants which may be stressed (not actively growing) due to prolonged periods of extreme cold, moisture stress (waterlogged or drought affected), poor nutrition, presence of disease, or previous herbicide treatment as reduced levels of control may result.
- Thorough coverage of both foliage and stems, to the point of runoff, is essential for high volume applications (see GENERAL INSTRUCTIONS; application methods WOODY WEED SITUATIONS section).
- DO NOT spray if rain is likely within one hour.

Table 1. Woody Weeds in Agricultural non-crop areas and Rights-of-way, Commercial and Industrial areas, Forests and Pastures

- Legumes present at the time of spraying will be severely damaged.

HIGH VOLUME APPLICATION: Dilute product with water See General Instructions - Application Method for application details				
WEEDS CONTROLLED	WEED GROWTH STAGE	STATE	RATE mL/100L of water	CRITICAL COMMENTS
Bathurst burr Noogoora burr	Seedlings and young plants up to 40 cm high	NSW, NT, Qld, WA only	75	
Black bindweed (Climbing buckwheat)	Seedlings and young plants before flowering	NSW, Qld only	300	
Mimosa pigra	Apply from mid to late summer.	NT, WA only		Add Uptake* Spraying Oil (see GENERAL INSTRUCTIONS; Oils and surfactants)
Common sensitive plant	Seedlings and young plants up to flowering	Qld, WA only	500	
Bellyache bush		Qld, NSW, WA only		
Blackberry nightshade		NSW, Qld only		
Bokhara clover				
Caltrop (yellow vine) (<i>Tribulus terrestris</i>) (<i>T. micrococcus</i>)	Seedlings and young plants up to 30 cm diameter.			
Cobblers pegs	Up to 15 cm high			
Cockspur thorn	Up to 3 m high			
Creeping lantana	At flowering			
Crofton weed Mistflower	Seedlings and young plants up to flowering.			
Docks (<i>Rumex</i> spp.)	Seedlings and rosettes up to 30 cm high.			
Hexham scent	Seedlings and young plants up to flowering			
Honey locust	Seedlings and young plants up to 2 m high			
Small flowered mallow (Marshmallow) (<i>Malva parviflora</i>)	Seedlings and young plants up to flowering			
Yellowflower Devil's claw	Seedlings and young plants up to flowering			
Lantana	Seedlings and regrowth 0.5 to 1.2 m high			Apply to actively growing plants from October to April. Some regrowth may occur particularly when treating old woody plants with sparse canopies.
	Plants and regrowth 1.2 to 2 m high	1000		
Blue heliotrope	Flowering			
Limebush	Infestations up to 1.5 m high only			
Madeira vine	Apply at time of active growth		500	
Milkweed (<i>Euphorbia heterophylla</i>)	3 leaf to flowering	Qld only	1000	Repeat applications will be necessary to control subsequent germinations.

Table 1. Woody Weeds in Agricultural non-crop areas and Rights-of-way, Commercial and Industrial areas, Forests and Pastures

- Legumes present at the time of spraying will be severely damaged.

HIGH VOLUME APPLICATION: Dilute product with water See General Instructions - Application Method for application details				
WEEDS CONTROLLED	WEED GROWTH STAGE	STATE	RATE mL/100L of water	CRITICAL COMMENTS
Common sowthistle	Seedlings and young plants up to bolting	NSW, Qld only	500	Add a surfactant (See GENERAL INSTRUCTIONS; Oils and surfactants).
Mother-of-millions (<i>Kalanchoe</i> spp.)	Seedling and young plants before flowering		600	
Prickly acacia	Seedling and young plants up to 2 m high.	Qld only	750	Add Uptake Spraying Oil (See GENERAL INSTRUCTIONS; Oils and surfactants). Consult Tropical Weeds Research Centre, Charters Towers, for specific advice on application.
Sida spp.	Seedlings and young plants up to flowering.	NSW, NT Qld, WA	1000	

HIGH VOLUME APPLICATION: Dilute product with water
See General Instructions - Application Method for application details

WEEDS CONTROLLED	WEED GROWTH STAGE	STATE	RATE mL/100L of water	CRITICAL COMMENTS
Broadleaf Pepper tree (<i>Schinus terebinthifolius</i>) QLD only	Mature leaves, fruiting	Qld only	500	Winter application only. Contact Alan Fletcher Research Station for more information.
Flannel weed (<i>Sida cordifolia</i>)				
Snakeweed, (Dark and light blue)	Seedling and young plants before flowering		750	Add Uptake Spraying Oil (See GENERAL INSTRUCTIONS; Oils and surfactants)
Stinking Passion Flower	Established plants and regrowth	Qld, NT, WA	450	Use 70 mL/15 L for a knapsack
Wandering jew (<i>Tradescantia albiflora</i>)	Young plants up to and including flowering.	All States	1500	Some regrowth will usually occur and will require retreatment
Wattles (including <i>Acacia aulacocarpa</i> <i>A. decora</i> <i>A. harpophylla</i> <i>A. leiocalyx</i> <i>A. salicina</i>)	Seedling plants or regrowth 0.5 to 1.2 m high	NSW, Qld only	500	Apply to actively growing plants when soil moisture is plentiful. Some regrowth may occur particularly when treating old woody plants with sparse canopies and under dry conditions.
	Plants or regrowth 1.2 to 2.0 m high only		1000	

BASAL BARK AND CUT STUMP APPLICATION: Dilute product with diesel
See General Instructions - Application Method for application details

WEEDS CONTROLLED	WEED GROWTH STAGE	STATE	RATE L/100L diesel	CRITICAL COMMENTS
<i>Celtis (Celtis sinensis)</i>	Basal Bark only: Young plants up to 2 m high and 20 cm basal diameter	Qld only	3.5	Treat stems from ground level to where multi-stemmed trunks branch.
Chinee apple	Up to 15 cm basal diameter		3	With basal bark, treat circumference of stem to a height of 45 cm from the ground Contact The Land Protection Branch, Department of Lands, Qld, for further information on Chinee Apple.
Cockspur thorn	Basal Bark only: Up to 5 cm basal diameter.		2	
Mimosa bush (<i>Acacia farnesiana</i>)	Up to 5 cm basal diameter	Qld, WA only	3	
Prickly acacia	Up to 10 cm basal diameter	Qld only	1.5	

Table 1. Woody Weeds in Agricultural non-crop areas and Rights-of-way, Commercial and Industrial areas, Forests and Pastures

- Legumes present at the time of spraying will be severely damaged.

BASAL BARK AND CUT STUMP APPLICATION: Dilute product with diesel
See General Instructions - Application Method for application details

WEEDS CONTROLLED	WEED GROWTH STAGE	STATE	RATE L/100L diesel	CRITICAL COMMENTS
Honey locust	Plants up to 10 cm basal diameter	Qld, NSW only	1.5	With basal bark, treat circumference of stem to a height of 45 cm from the ground For cut stump application use a rate of 5L/100L diesel for all plant sizes. Contact The Land Protection Branch, Department of Lands, Qld, for further information on Honey Locust.
	Plants 10 to 20 cm basal diameter		3	
	Plants >20 cm basal diameter		5	
Sisal hemp (<i>Agave spp.</i>)	All growth stages	Qld only	3	Treat as an overall spray. Contact The Land Protection Branch, Department of Lands, Qld for advice to control large infestations.
			10mL undiluted product per plant	Lever out centre of plant with crowbar and immediately treat the exposed cut area.

BROADCAST AND AERIAL APPLICATION: Dilute product with water
See General Instructions - Application Method for application details

WEEDS CONTROLLED	WEED GROWTH STAGE	STATE	RATE L/ha	CRITICAL COMMENTS
<i>Mimosa pigra</i>	Actively growing plants	NT, WA only	3	Aerial application: Add Uptake Spraying Oil at the rate of 1L/100L spray mix. Apply to actively growing plants from mid to late summer. Contact the Department of Primary Industries and Fisheries, NT for further information.

LOW VOLUME, HIGH CONCENTRATE APPLICATION: Using a drench gun or gas-powered gun
See General Instructions - Application Method for application details

WEEDS CONTROLLED	WEED GROWTH STAGE	STATE	RATE L/10L of water	CRITICAL COMMENTS
Limebush	Isolated bushes up to 1.2 m high only	NSW, Qld only	1	Apply a 50 mL dose per 5m ² of bush surface area.
Tree violet (<i>Hymenanthera dentata</i>)	Apply from late flowering to green fruit up to 1.2 m high			Apply a 50 mL dose per cubic metre of bush.

Table 2: Established Grass Pastures

WEEDS CONTROLLED	WEED GROWTH STAGE	STATE	RATE L/ha	CRITICAL COMMENTS
Blue billygoat weed Common sensitive plant Giant sensitive plant Spinyhead sida	Apply before flowering	Qld, WA only	1.5	Add Uptake Spraying Oil at 1 L/ha.
St John's wort	Apply from bud to full bloom (usually late Nov to early Jan)	ACT, NSW and Vic only	3	Some regrowth will occur. Treat regrowth the following season for best results. Use at least 200 L water/ha.
Silverleaf nightshade	From onset of flowering to early berry-set. (usually spring to mid-summer)	NSW only	0.75 or 0.375 + Ken-Amine 500 at 1.5-2L/ha	Add Uptake Spraying Oil at 1 L/ha To ensure maximum effect, delay application until the majority of shoots have emerged. Follow-up treatment of regrowth is critical for best control.

BROADCAST AND AERIAL APPLICATION: Dilute product with water See General Instructions - Application Method for application details					
WEEDS CONTROLLED	WEED GROWTH STAGE	STATE	RATE L/ha	CRITICAL COMMENTS	
Mimosa pigra	Actively growing plants	NT, WA only	3	Aerial application: Add Uptake Spraying Oil at the rate of 1L/100L spray mix. Apply to actively growing plants from mid to late summer. Contact the Department of Primary Industries and Fisheries, NT for further information.	
LOW VOLUME, HIGH CONCENTRATE APPLICATION: Using a drench gun or gas-powered gun See General Instructions - Application Method for application details					
WEEDS CONTROLLED	WEED GROWTH STAGE	STATE	RATE L/10L of water	CRITICAL COMMENTS	
Limebush	Isolated bushes up to 1.2 m high only	NSW, Qld only	.1	Apply a 50 mL dose per 5m ² of bush surface area.	
Tree violet (<i>Hymenanther a dentata</i>)	Apply from late flowering to green fruit up to 1.2 m high	NSW only		Apply a 50 mL dose per cubic metre of bush.	

Table 3: Sorghum, Maize, Millets and Sweet Corn (NSW and QLD only)

CROP	CROP GROWTH STAGE	WEEDS CONTROLLED	WEED GROWTH STAGE	RATE L/ha	CRITICAL COMMENTS
Sorghum Maize and Sweet corn Millets	Apply when secondary roots are present, from 4 fully expanded leaves (15 cm tall) up to boot (also see CRITICAL COMMENTS)	Annual ground cherry Wild gooseberry (<i>Physalis spp.</i>)	2 to 8 leaf Up to 15 cm tall	0.5	Sorghum: From 8 leaf to boot stage; use dropper nozzles to prevent herbicide coming in contact with the crop's leaves and the growing point (meristem).
		Apple-of-Peru	15 to 30 cm tall Seedling plants Up to 15 cm tall	0.75	
		Bathurst burr Noogoora burr	2 to 8 leaf Up to 20 cm tall	0.5	
		Pigweed (<i>Portulaca oleracea</i>)	20 to 50 cm tall Up to 10 cm diameter	0.75 0.5	Maize and sweet corn: From 6 leaf to just before tasselling, use dropper nozzles to prevent the herbicides coming in contact with the crop's leaves and the growing point (meristem).
		Sesbania pea	10 to 30 cm diameter 2 to 6 leaf Up to 10 cm tall	1.5	Millets: DO NOT use mixes with Atrazine
	Apply when secondary roots are present, from 3 fully expanded leaves (10 cm tall) up to just before tasseling (See CRITICAL COMMENTS) Spray when secondary roots have developed, usually early to mid-tillering, and not later than before heads start to form at the base of tillers. (See CRITICAL COMMENTS)	Silverleaf nightshade (NSW only) ①	Full flower to early berry	0.75 + Uptake at 1 L/ha	① This treatment may be slightly damaging to the crop. To minimise crop damage apply using dropper nozzles at all crop stages.
		Starburr (<i>Acanthospermum hispidum</i>) (Qld only)	Up to 12 leaf and before flowering	1.5 or 0.75 + Kenso Agcare Atrazine 500 at 2L/ha	
		Thornapples (<i>Datura spp.</i>)	2 to 8 leaf Up to 15 cm tall	0.75	
		Volunteer sunflower	2 to 5 leaf Up to 20 cm tall	1	

Fluroken 200 in tank-mixes with atrazine: Sorghum, Maize and Sweet Corn

Sorghum, Maize and Sweet corn (continued)	See Above	Amaranthus spp. including: Boggabri weed, Dwarf amaranth, Green amaranth, Redshank Anoda weed Bladder ketmia Black pigweed (<i>Trianthema portulacastrum</i>) Caltrop (yellow vine), including: <i>Tribulus terrestris</i> , <i>T. micrococcus</i> and <i>T. maximus</i> Cowvine (peach vine) (<i>Ipomoea lonchophylla</i>) Hairy wandering jew (<i>Commelina benghalensis</i>) Mintweed	Seedling plants up to 15 cm tall or rosettes up to 15 cm diameter	0.5 + Kenso Agcare Atrazine at 1.5L/ha or 0.75 + Kenso Agcare Atrazine 500 at 2L/ha	Use the low rate (0.5 L + 1.5 L) when weeds are small (5-7 cm tall/diameter). Use the high rate (0.75 L + 2 L) when the weeds are larger (7-15 cm tall/diameter). Fluroken 200 is generally more compatible with Liquid atrazine products (see GENERAL INSTRUCTIONS; compatibility section) Add a surfactant (see GENERAL INSTRUCTIONS: Oils and surfactants) DO NOT add an oil to mixtures of Fluroken 200 and atrazine
Sweet Corn: Tasmania only					
Sweet corn only	3 to 5 leaf	Blackberry nightshade Volunteer potatoes	3 to 5 leaf	1	

Table 4: Winter Cereals (Wheat, Barley, Oats and Triticale)

CROP GROWTH STAGE	WEEDS CONTROLLED	WEED GROWTH STAGE	STATE	RATE L/ha	CRITICAL COMMENTS
Apply from 3 leaf to flag (Zadoks 13 to 39)	Bedstraw (<i>Galium tricornutum</i>)	1 to 3 whorl	Vic, SA, WA only	1	Add either Uptake or a surfactant (see GENERAL INSTRUCTIONS; Oils and surfactants).
	Cleavers (<i>Galium aparine</i>)		NSW, Vic only		
	Black bindweed (Climbing buckwheat)	2 to 4 leaf	NSW, Qld only	0.50 –	
		2 to 6 leaf		0.75 or 0.5 + Ken-Met 600 at 5g/ha –	
	Common sowthistle (<i>Sonchus oleraceus</i>)	2 to 5 leaf		1	
	Deadnettle	2 to 6 leaf		1.5 or 0.5 + Ken-Met 600 at 5g/ha –	
	Spiny emex (Doublegee, Three cornered jack)	2 to 4 leaf	NSW, SA Qld, WA,	1	
	Prickly lettuce	2 to 5 leaf		1	
	Volunteer lupins	2 to 8 leaf	NSW, Vic WA only,	1.5	Plants 15 to 30 cm tall will only be suppressed.
	Volunteer potato	10 to 15 cm tall	WA and Tas only		
	Wireweed	2 to 3 leaf	NSW, Qld, SA, Tas, Vic, WA	0.5 + Ken-Met 600 at 5g/ha –	The Fluroken 200 rate depends on what other weeds are present as listed above See Mixtures comment above Ken-Met 600@ 5g/ha (This mix does not control wild radish) Eclipse @ 5-7g/ha (use the 5g rate on turnip weed only) MCPA LVE (500g/L) @ 700 mL/ha Kenso Agcare MCPA 500 @ 1.0L/ha.
	Bittercress (<i>Coronopus didymus</i>) Mustards Shepherd's purse Turnip weed Wild radish Wild turnip	Up to 8 leaf and up to 15 cm diameter	Qld, NSW, Vic SA, Tas, WA		

Table 5: Summer Fallow

Polymeria pusilla	2 to 10 leaf up to 20 cm diameter		1① or 0.5 + Ken-Up 450 CT at 1.2L/ha	
Rhynchosia	Seedlings to early flowering		1① or 0.375 + Ken-Up 450 CT at 0.8L/ha	
Smallflower mallow or Marshmallow (<i>Malva parviflora</i>)	up to 8 leaf up to 20 cm		1①	
Thornnapples (<i>Datura</i> spp.)	2 to 8 leaf up to 15 cm diameter	NSW, Qld, WA only	0.75 ① or 0.5 + Ken-Up 450 CT at 1.2L/ha	
Sesbania pea	2 to 6 leaf up to 10 cm tall	NSW, Qld only	1.5 ① or 0.5 + Ken-Up 450 CT at 1.2L/ha	
Perennial Ground Cherry (<i>Physalis virginiana</i>) ②	bud to early flowering up to 20 cm tall		1.5 or 3 ①	② Delay treatment until the maximum number of shoots have emerged, but before the onset of fruiting (late summer) DO NOT treat plants showing symptoms from previous treatment Use the high rate when longer term weed control (6-10 months) is required and delay planting crops during this period. The low rate will require follow-up treatments
Silverleaf nightshade	Full flower to early berry-set (usually Dec - Feb)	NSW only	0.75 or 0.375 + Ken-Amine 500 at 1.5-2L/ha	Add Uptake spraying oil at the rate of 1L/100L spraying To ensure maximum effect, delay application until the majority of shoots have emerged. Follow-up treatment will be required to control regrowth and is critical for optimal control. If wanting to prevent seed set repeat applications may be needed in the same season, although this does not lead to better long term control.
Volunteer peanuts	Up to 15 cm diameter	Qld only	1 + Kenso Agcare Atrazine 500 at 4.5L/ha	Add a surfactant (see GENERAL INSTRUCTIONS; Oils and surfactants) Important: See GENERAL INSTRUCTIONS; Compatibility section
Volunteer sunflowers	2 to 5 leaf up to 20 cm	NSW, Qld only	1	Add Uptake Spraying Oil (See GENERAL INSTRUCTIONS; Oils and surfactants section)

Table 6: Winter Fallow

WEEDS CONTROLLED	WEED GROWTH STAGE	STATE	RATE L/ha	CRITICAL COMMENTS
Bedstraw (<i>Galium tricornutum</i>)	Up to 5 whorl	Vic, SA, WA only	1 ①	① Add Uptake Spraying Oil (See GENERAL INSTRUCTIONS; oils and surfactants)
Cleavers (<i>Galium aparine</i>)		NSW, Vic only		② Add Uptake or a surfactant (See GENERAL INSTRUCTIONS; oils and surfactants section)
Black bindweed (Climbing buckwheat)	2 to 8 leaf up to 10 cm diameter	NSW, Qld only	0.75 ①	
Common sowthistle (<i>Sonchus oleraceus</i>)	2 to 5 leaf up to 10 cm diameter		1.0 ① or 0.5 + Ken-Up 450 CT at 0.6L/ha	When mixing with Ken-Up 450 CT to control both grass and broadleaf weeds, refer to the Ken-Up 450 CT label for use rates and adjuvants recommended for the grasses (see GENERAL INSTRUCTIONS; Compatibility Section)
Prickly lettuce				
Spiny emex (Doulegee, Three cornered jack)	2 to 8 leaf		1.5 ① or 0.5 ② + Ken-Met 600 at 5g/ha	
Wireweed	2 to 3 leaf up to 10 cm tall		1.5 ① or 0.5 ② + Ken-Met 600 at 5g/ha or 0.5 ② + Ken-Up 450 CT at 0.6L/ha	

Table 7: Sugar cane (Qld, NSW, NT and WA only)

CROP GROWTH STAGE	WEEDS CONTROLLED	WEED GROWTH STAGE	RATE L/ha	CRITICAL COMMENTS
From early tillering to maturity	Balsam pear Blackberry nightshade Blue billygoat weed Centro Cowpea Giant sensitive plant Lablab bean Noogoora burr Phasey bean Pinkbur Prickly african cucumber Spinyhead sida Stinking passion flower (seedlings only)	Apply from 2 to 3 leaf until flowering	Ground: 1.3 Aerial: 1.5	For optimal weed control, delay application until just before the "close-in" stage. Aerial application: Apply in not less than 60 L/ha water and add Uptake Spraying Oil at 1 L / 100 L spray mixture. Ground application: Apply in 100 - 400 L/ha water and add Uptake Spraying Oil at 500 mL / 100L of spray mixture.
	Bellvine Morning glory Red or pink convolvulus Star-of-Bethlehem		As above + Ken-Amine 500 at 1L/ha	
	Stinking passion flower	Established or ratoon plants with at least 1.0 m of regrowth	High volume: 450 mL / 100L water Knapsack: 70 mL / 15L water	Thoroughly wet plants to the point of run-off.
	Milkweed (<i>Euphorbia heterophylla</i>)	Seedlings and young plants up to flowering	3 or 2.3 + Kenso Agcare Atrazine 500 at 4L/ha	Better control will be achieved with the atrazine mixture. Delay application until just before the cane reaches the "close-in" stage. This will improve control and minimise the number of seedlings that germinate.

Table 8: Lucerne (NSW Only)

CROP GROWTH STAGE	WEEDS CONTROLLED	WEED GROWTH STAGE	RATE L/ha	CRITICAL COMMENTS
Established crops at least eighteen months old	Annual ground cherry Bathurst burr Noogoora burr Wild gooseberry	2 to 8 leaf up to 15 cm high	0.5	To minimize crop injury and to maximize weed control, cut, slash or heavily graze the lucerne before application. Wherever possible, irrigate before application to stimulate weed growth.
	Pigweed	Up to 10 cm diameter		DO NOT treat crops growing on sandy or stony soils. DO NOT treat crops after the summer growing season (after end of March). To broaden the spectrum of weeds controlled, Fluroken 200 can be mixed with 2, 4-DB amine.

Table 9: Poppies (TAS only)

CROP GROWTH STAGE	WEEDS CONTROLLED	WEED GROWTH STAGE	RATE L/ha	CRITICAL COMMENTS
4 to 6 leaf	Cleavers Fumitory	2 to 6 leaf	1	
	Shepherd's purse Wireweed		1 + Asulox at 5L/ha	
8-10 leaf	Common sowthistle Prickly lettuce	2 to 5 leaf	1	DO NOT apply Fluroken 200 to poppies later than the 8 to 10 leaf growth stage as a reduction of alkaloid content could occur.
	Black nightshade	cotyledon to 4 leaf	1.5	
	Fumitory	6 to 10 leaf	This rate will provide season long control of volunteer potato, but will not control all daughter tubers and will only suppress potatoes over 15 cm tall.	
	Volunteer potato	From tuber initiation to flower bud		

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION

WITHHOLDING PERIODS:

CROPS AND PASTURES: DO NOT GRAZE FAILED CROPS AND TREATED PASTURES OR CUT FOR STOCK FOOD FOR 7 DAYS AFTER APPLICATION.

POPPIES: DO NOT SPRAY POPPIES LATER THAN 10 WEEKS BEFORE HARVEST

MINIMUM RECROPPING PERIODS

Plant-back periods for crops following the application of Fluroken 200 for rates up to 1.5 L/ha			
RATE L/HA	0.375	0.75	1.5
CROP	Days		
Barley	7	7	7
Wheat	7	7	7
Chickpea	7	7	7
Cotton	14	14	28
Soybean	7	7	14
Sunflower	7	7	7
Maize	7	7	7
Sorghum	7	7	7

Note: Before using Fluroken 200 in tank mixes with other herbicides, check the plantback information on all product labels. The time between spraying and planting will be determined by the most residual product, i.e. the product with the longest plant-back period.

GENERAL INSTRUCTIONS

MIXING:

- Fluroken 200 may be mixed with water or diesel.
- Mix only sufficient chemical for each days use and avoid storing.
- **Mixing in Water:** Half fill the spray tank with water and add the required quantity of Fluroken 200 and complete filling. Agitate continuously to ensure thorough mixing before and during application.
- **Mixing in Diesel:** Half fill the spray tank with diesel and add the required quantity of Fluroken 200. Add the remainder of the diesel and agitate or shake to mix contents.
- **Tank mixtures:** Wettable powder or dry flowable formulations (e.g. water dispersible granules) should be added to the spray tank first, followed by suspension concentrates (flowables), water soluble salts and then emulsifiable concentrate formulations (Fluroken 200). Add spraying oils and surfactants (wetters) last.

OILS AND SURFACTANTS

Oils:

Use only Uptake Spraying Oil at the rate of 500 mL / 100 L of spray mix. When using less than 100 L/ha spray volume, ensure a minimum of 250 mL/ha of Uptake is used, unless 1 L / 100 L or 1 L/ha is specified.

Surfactants (wetters):

Use a 100% concentrate non-ionic surfactant such as Ken-Wett 1000 at 100 mL / 100 L of spray mix where required.

COMPATIBILITY

Fluroken 200 is compatible with the herbicides listed.

Follow any regional restrictions, and all directions and restrictions on the label, of any chemical mixed with Fluroken 200.

Kenso Agcare Atrazine 500	Lontrel	Tordon 75-D
Ken-Met 600	Kenso Agcare MCPA 500	Tordon 242
Broadstrike	Puma S	Touchdown
Eclipse	Ken-Up Herbicide By Kenso	Ken-Amine 500
Ken-Grass 375	Ken-Up 450 CT (see below)	2,4-DB
Kenso Agcare Triclopyr 600	Topik 240 EC (see below)	

ATRAZINE

- AVOID USING HARD WATER WHEREVER POSSIBLE.

Where hard water cannot be avoided, the addition of CALGON® water conditioning agent to the spray tank, at 100g / 100 L water, before adding any herbicide may improve compatibility.

- AGITATION IS VERY IMPORTANT WHEN MIXING FLUROKEN AND ATRAZINE.

Fluroken plus atrazine tank mixes must be agitated vigorously and continuously during mixing and application. After mixing DO NOT allow to stand without agitation. Ensure that the time from mixing to the end of application is not more than 2 hours. If settling out occurs re-suspension is difficult, even with vigorous agitation. Agitation using only the pump's by-pass is usually inadequate, particularly with larger tanks (more than 2000L). Additional mechanical agitation will be necessary in large tanks, computer sprayers and mixing tanks.

- When additional surfactant is required, add a 100% concentrate non-ionic surfactant at 100 mL / 100 L of spray mix. DO NOT use a spraying oil when tank mixing Fluroken and atrazine.

Guidelines For Tank-Mixing Fluroken 200 And Common Atrazine Formulations:

Tank mix	Rate (L/ha)	Water Hardness			Minimum Water Volume (L/ha)		Comments
		Soft	Medium	Hard	Ground	Aerial	
Fluroken	0.75	✓	✓	✓	50	35	
Fluroken + Kenso Agcare Atrazine 500	0.75 + 2	✓	✓	✓	50 – 100	35	Precipitate can be easily resuspended
Fluroken + Kenso Agcare Atrazine 900 WG	0.75 + 1.1	✓	✗	✗	100	Do not use	Precipitate may be difficult to resuspend and may block nozzles
Fluroken + Atrazine DF	0.75 + 1.1	✓	✗	✗	100	Do not use	Sediment may be difficult to resuspend and may block nozzles
Fluroken + Kenso Agcare Atrazine 500	0.75 + 2	✓	✓	✗	100	Do not use	Precipitate may be difficult to resuspend and may block nozzles

TOPIK 240 EC

- Always use Uptake Spraying Oil with Fluroken 200 + Topik 240, EC tank-mixes at 500 mL / 100 L of spray mix with a minimum of 250 mL/ha.
- DO NOT mix Fluroken 200 with Topik 240 EC if the grass weeds are not actively growing. Always use the maximum label rate of Topik 240 EC for the appropriate grass growth stage.
- DO NOT use Fluroken 200 at more than 0.75 L/ha in tank mixes with Topik 240 EC.

KEN-UP 450 CT

- When mixing Fluroken 200 with Ken-Up 450 CT to control both grass and broadleaf weeds, refer to the Ken-Up 450 CT label for use rate and adjuvants recommended for grasses. DO NOT use Ken-Up 450 CT at less than 1.2 L/ha in tank mixes with Fluroken 200, when barnyard grass, buttongrass, crowsfoot grass, native millet and liverseed grass are the target species.

APPLICATION METHODS AND WATER RATES

BROADCAST APPLICATION IN CROPPING, PASTURE AND FALLOW SITUATIONS.

A.Ground application (Boom)

- Apply Fluroken 200 with an accurately calibrated boom sprayer, in at least 50 L/ha water (100–400 L/ha for sugar cane).
- Flat fan nozzles are recommended using pressures in the range 200 to 300 kPa.
- Set the boom at a height to ensure a double overlap of the nozzle patterns.

B.Ground directed application (Dropper nozzles)

- To minimise crop effects, dropper nozzles should be used in sorghum when the crop is beyond the 8 leaf growth stage and in maize and sweet corn when the crop is beyond the 6 leaf growth stage.
- Adjust the nozzles to direct the spray into the base of the crop and away from the leaves and the growing point. See manufacturers directions for setting up and calibration of dropper nozzles.

C.Aerial Application

- Apply in a minimum volume of at least 35 L/ha water (60 L/ha in sugarcane)
- Use equipment calibrated to produce droplets with an average diameter (Volume Mean Diameter; VMD) of 250 - 350 microns.
- DO NOT apply when the temperature is above 30°C, when there is no wind or when the wind is blowing toward susceptible crops.

WOODY WEED SITUATIONS

Weeds must be actively growing to attain optimal effect. Delay the treatment of regrowth following bulldozing; slashing, burning, ploughing or a previous chemical treatment until it has at least 1 metre of new, vigorous, growth.

A.High Volume Application

Hand Gun

- Apply the recommended mix to obtain full coverage of leaves and stems using a number 6 - 8 tip at 700 to 1500 kPa. To obtain good coverage, a spray volume of 1500 to 4000 L/ha (15 to 40 L / 100 m²) is required per infested hectare.
- Ensure thorough coverage to the point of runoff.

Knapsack

- Knapsack sprayers may be used on smaller infestations where penetration and coverage of the canopy is easier to achieve. Use the same use rate and spray techniques as for handgun application.

B.Low Volume, High Concentrate Application

Drench Gun or Gas-Powered Gun

- Apply the recommended mixture uniformly across the foliage by applying 50 mL shots to cover 4 to 5 m² of surface area of plant. This is approximately equivalent to 20 droplets per cm² of the leaf surface. Use a marking agent as recommended by the equipment manufacturer to check spray coverage.

C.Basal Bark and Cut Stump Application

Basal Bark

- DO NOT apply to wet stems as this can repel the diesel mixture.
- Spray or paint the recommended mixture around the base of each stem from ground level to a height of at least 30 cm from the ground, wetting the bark to the point of runoff.
- Apply with a paint brush or a pressure sprayer with an appropriate lance and solid cone nozzle. If using spray equipment use low pressures (? 200 kPa) sufficient to form a cone of spray.
- Old rough bark will require more spray than smooth or young thin bark.

Cut Stump

- Apply the recommended mixture liberally to the freshly cut stump immediately after cutting.
- Apply by spraying or painting the cut surface and sides of the stump.
- Best results are obtained when the stems are cut less than 15 cm above the ground.

CLEANING SPRAY EQUIPMENT:

Rinse water should be discharged onto a designated disposal area or, if this is unavailable, onto wasteland away from desirable plants and watercourses.

Cleaning equipment after using water-based sprays:

- **Rinsing:** After using Fluroken 200 Herbicide, empty the tank completely and drain the whole system. Thoroughly wash inside the spray unit using a pressure hose. Drain, and clean any filters in the tank, pump, lines, hoses and nozzles.
- After cleaning the tank as above, quarter fill with clean water and circulate through the pump, lines and nozzles. Drain and repeat the rinsing procedure twice.
- **Decontamination (before spraying cotton and other sensitive crops; see PROTECTION OF CROPS):** Wash the tank and rinse the system as above. Then quarter fill the tank and add an alkali detergent (e.g. liquid SURF, OMO or DRIVE) at 500 mL / 100L of water or the powder equivalent at 500 g / 100 L and circulate throughout the system for at least 15 minutes.
- Drain the whole system. Remove filters and nozzles and clean them separately. Finally flush the system with clean water and allow draining.

Cleaning equipment after using diesel - based sprays:

- On completion of spraying, use a degreaser such as Caltex Kwik-D-Grease® to remove traces of diesel from the sprayer. Rinse tank and spray through nozzles with water to remove degreaser.
- Then, quarter fill the tank with clean water and add an alkali detergent (e.g. liquid SURF®, OMO® or DRIVE®) at 50 mL / 10 L of water or the powder equivalent at 50 g / 10 L of water. Shake sprayer, to circulate the washing solution throughout the sprayer, and then spray the solution through the nozzles. Rinse well with clean water to remove the detergent.
- To clean brushes and containers, spray liberally with degreaser. Hose off with clean water and repeat using detergents as above.
- DO NOT use this equipment for any other purpose.
