

Product Name: BARRICADE Pre-Emergent Herbicide HG  
APVMA Approval No: 93901/140816

Label Name:	BARRICADE Pre-Emergent Herbicide HG
-------------	-------------------------------------

Signal Headings:	READ SAFETY DIRECTIONS BEFORE OPENING OR USING
------------------	--

Constituent Statements:	ACTIVE CONSTITUENT: 480 g/L PRODIAMINE
-------------------------	--

Statement of Claims:	For preventative control of weeds before weed germination in established lawns & turf, garden beds and potted plants.  • Long lasting preventative weed control for up to 6 months • Can be used in a variety of situations • Controls weeds before they become a problem
----------------------	---

Net Contents:	100 mL – 5 L
---------------	--------------

Restraints:	DO NOT apply to turf under stress, newly seeded, newly laid turf or sprigged turf. Delay application until turf is at 100% cover and established with a root system developed beyond 3 cm depth. DO NOT apply if heavy rain has been forecast within 48 hours or to waterlogged soil. DO NOT water or irrigate to the point of runoff within 3 days of application. DO NOT apply in vegetable gardens or around fruit trees or sensitive plants. DO NOT apply to garden beds over the top of mulch. DO NOT apply to recently re-potted or newly potted seeds, cuttings divisions or plants. Allow a period of establishment to allow a substantial root system to develop. DO NOT plant seeds in treated soil for 6 months after application.
-------------	--

How to Use:	Refer to the attached file.
-------------	-----------------------------

Withholding Periods:	DO NOT GRAZE TREATED TURF/LAWN OR FEED TURF/LAWN CLIPPINGS FROM ANY TREATED AREA TO POULTRY OR LIVESTOCK
----------------------	--

How to Prepare:	<p><b>HOW TO PREPARE</b></p> <p>Mix BARRICADE Pre-Emergent Herbicide as per the instructions below into a diluted mixture ready for application. If the diluted solution is left standing for some time, make sure you shake/agitate before use.</p> <p><b>Mixing – Garden Sprayer</b></p> <ol style="list-style-type: none"> <li>1. Prior to opening, shake BARRICADE Pre-Emergent bottle well.</li> <li>2. Add half the required amount of water to your garden sprayer.</li> <li>3. Add the required quantity of BARRICADE Pre-Emergent to the half full garden sprayer.</li> <li>4. Add the remaining water required and ensure sprayer is closed before agitating sprayer.</li> <li>5. Only mix sufficient spray solution for application area and for the day of mixing.</li> </ol> <p><b>Mixing – Watering Can</b></p> <ol style="list-style-type: none"> <li>1. Prior to opening, shake BARRICADE Pre-Emergent bottle well.</li> <li>2. Add half the required amount of water to your watering can.</li> <li>3. Add the required quantity of BARRICADE Pre-Emergent to your watering can.</li> <li>4. Add the remaining water required and use the process to agitate the mixture.</li> <li>5. First Aid Instructions:	First aid is not generally required. If in doubt, contact a Poisons Information Centre (phone Australia 13 11 26 or a doctor.
First Aid Warnings:	

## HOW TO USE

Apply BARRICADE Pre-Emergent Herbicide before weed germination for preventative control of up to 6 months. Apply in early spring (summer weeds) or late summer to early autumn for Winter Grass. BARRICADE Pre-Emergent Herbicide does not control weeds that have already germinated; therefore, a post-emergent herbicide should be applied to remove these weeds.

Situation	Weeds	Rate	Comments
Established lawns and turf grass including: Buffalo Grass Carpet Grass Couch (Common, Hybrid), Qld Blue Couch Kikuyu Paspalum Seashore Zoysia	Barnyard Grass Crab Grass Parramatta Grass Rat's Tail Fescue Summer Grass Crowsfoot Grass African Lovegrass Bahia Grass Kentucky Blue Grass Paspalum Winter Grass	<b>Garden Sprayer</b> Use 30 mL per 10 L water and spray over 100 m <sup>2</sup>  <b>Watering Can</b> Mix 3 mL in 9 L of water and evenly apply over 10 m <sup>2</sup>	<b>For all weeds (except Winter Grass)</b>  Apply prior to weed emergence. For best results apply in early spring for preventative control of up to 6 months.  <b>For Winter Grass</b>  Apply in late summer to early autumn prior to weed emergence for preventative control of up to 6 months.  For all grasses lightly water in, within 24 hours of application.
Garden beds (under mulch) and potted plants	African Lovegrass Barnyard Grass Chickweed Crab Grass Crowsfoot Grass Creeping Oxalis Cudweed Paspalum Prairie Grass Rat's Tail Fescue Ryegrass Sow Thistle Summer Grass Willowherb Winter Grass	<b>Garden Sprayer</b> Use 40 to 80 mL per 10 L water and spray over 100 m <sup>2</sup>  <b>Watering Can</b> Mix 4 to 8 mL in 9 L of water and evenly apply over 10 m <sup>2</sup>	Apply prior to weed emergence for residual control of up to 4 months in potted plants and up to 6 months in garden beds under mulch. Use higher rates in situations of high weed pressure. Apply the product to garden beds and wash in before applying mulch so that the herbicide reaches the soil.  Water immediately after application with a minimum of 3mm rain or irrigation.

**NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION**
